
UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

**Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934**

For the Quarterly Period Ended March 31, 2016

Commission File No. 1-13653

AMERICAN FINANCIAL GROUP, INC.

Incorporated under the Laws of Ohio

IRS Employer I.D. No. 31-1544320

301 East Fourth Street, Cincinnati, Ohio 45202
(513) 579-2121

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 1, 2016, there were 86,706,813 shares of the Registrant's Common Stock outstanding, excluding 14.9 million shares owned by subsidiaries.

A. Accounting Policies

Basis of Presentation The accompanying consolidated financial statements for American Financial Group, Inc. and its subsidiaries (“AFG”) are unaudited; however, management believes that all adjustments (consisting only of normal recurring accruals unless otherwise disclosed herein) necessary for fair presentation have been made. The results of operations for interim periods are not necessarily indicative of results to be expected for the year. The financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all information and footnotes necessary to be in conformity with U.S. generally accepted accounting principles (“GAAP”).

Certain reclassifications have been made to prior periods to conform to the current year’s presentation. All significant intercompany balances and transactions have been eliminated. The results of operations of companies since their formation or acquisition are included in the consolidated financial statements. Events or transactions occurring subsequent to March 31, 2016, and prior to the filing of this Form 10-Q, have been evaluated for potential recognition or disclosure herein.

The preparation of the financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Changes in circumstances could cause actual results to differ materially from those estimates.

Fair Value Measurements Accounting standards define fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. The standards establish a hierarchy of valuation techniques based on whether the assumptions that market participants would use in pricing the asset or liability (“inputs”) are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect AFG’s assumptions about the assumptions market participants would use in pricing the asset or liability. AFG did not have any significant nonrecurring fair value measurements in the first three months of 2016.

Investments Fixed maturity and equity securities classified as “available for sale” are reported at fair value with unrealized gains and losses included in accumulated other comprehensive income (“AOCI”) in AFG’s Balance Sheet. Fixed maturity and equity securities classified as “trading” are reported at fair value with changes in unrealized holding gains or losses during the period included in net investment income. Mortgage and policy loans are carried primarily at the aggregate unpaid balance.

In January 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-01, which, among other things, will require all equity securities currently classified as “available for sale” to be reported at fair value, with holding gains and losses recognized in net income, instead of AOCI. AFG will be required to adopt this guidance effective January 1, 2018.

Premiums and discounts on fixed maturity securities are amortized using the interest method. Mortgage-backed securities (“MBS”) are amortized over a period based on estimated future principal payments, including prepayments. Prepayment assumptions are reviewed periodically and adjusted to reflect actual prepayments and changes in expectations.

Gains or losses on securities are determined on the specific identification basis. When a decline in the value of a specific investment is considered to be other-than-temporary at the balance sheet date, a provision for impairment is charged to earnings (included in realized gains (losses) on securities) and the cost basis of that investment is reduced. If management can assert that it does not intend to sell an impaired fixed maturity security and it is not more likely than not that it will have to sell the security

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

before recovery of its amortized cost basis, then the other-than-temporary impairment is separated into two components: (i) the amount related to credit losses (recorded in earnings) and (ii) the amount related to all other factors (recorded in other comprehensive income). The credit-related portion of an other-than-temporary impairment is measured by comparing a security's amortized cost to the present value of its current expected cash flows discounted at its effective yield prior to the impairment charge. Both components are shown in the statement of earnings. If management intends to sell an impaired security, or it is more likely than not that it will be required to sell the security before recovery, an impairment charge to earnings is recorded to reduce the amortized cost of that security to fair value.

Derivatives Derivatives included in AFG's Balance Sheet are recorded at fair value. Changes in fair value of derivatives are included in earnings, unless the derivatives are designated and qualify as highly effective cash flow hedges. Derivatives that do not qualify for hedge accounting under GAAP consist primarily of (i) components of certain fixed maturity securities (primarily interest-only MBS) and (ii) the equity-based component of certain annuity products (included in annuity benefits accumulated) and related call options (included in other investments) designed to be consistent with the characteristics of the liabilities and used to mitigate the risk embedded in those annuity products.

To qualify for hedge accounting, at the inception of a derivative contract, AFG formally documents the relationship between the terms of the hedge and the hedged items and its risk management objective. This documentation includes defining how hedge effectiveness and ineffectiveness will be measured on a retrospective and prospective basis.

Changes in the fair value of derivatives that are designated and qualify as highly effective cash flow hedges are recorded in AOCI and are reclassified into earnings when the variability of the cash flows from the hedged items impacts earnings. Any hedge ineffectiveness is immediately recorded in current period earnings. When the change in the fair value of a qualifying cash flow hedge is included in earnings, it is included in the same line item in the statement of earnings as the cash flows from the hedged item. AFG uses interest rate swaps that are designated and qualify as highly effective cash flow hedges to mitigate interest rate risk related to certain floating-rate securities included in AFG's portfolio of fixed maturity securities.

For derivatives that are designated and qualify as highly effective fair value hedges, changes in the fair value of the derivative, along with changes in the fair value of the hedged item attributable to the hedged risk, are recognized in current period earnings. AFG has entered into an interest rate swap that qualifies as a highly effective fair value hedge to mitigate the interest rate risk associated with fixed-rate long-term debt by economically converting certain fixed-rate debt obligations to floating-rate obligations. Since the terms of the swap match the terms of the hedged debt, changes in the fair value of the swap are offset by changes in the fair value of the hedged debt attributable to changes in interest rates. Accordingly, the net impact on AFG's current period earnings is that the interest expense associated with the hedged debt is effectively recorded at the floating rate.

Goodwill Goodwill represents the excess of cost of subsidiaries over AFG's equity in their underlying net assets. Goodwill is not amortized, but is subject to an impairment test at least annually. An entity is not required to complete the quantitative annual goodwill impairment test on a reporting unit if the entity elects to perform a qualitative analysis and determines that it is more likely than not that the reporting unit's fair value exceeds its carrying amount.

Reinsurance Amounts recoverable from reinsurers are estimated in a manner consistent with the claim liability associated with the reinsured policies. AFG's property and casualty insurance subsidiaries report as assets (i) the estimated reinsurance recoverable on paid and unpaid losses, including an estimate for losses incurred but not reported, and (ii) amounts paid or due to reinsurers applicable to the unexpired terms of policies in force. Payable to reinsurers includes ceded premiums due to reinsurers, as well as ceded premiums retained by AFG's property and casualty insurance subsidiaries under contracts to fund ceded losses as they become due. AFG's insurance subsidiaries also assume reinsurance from other companies. Earnings on reinsurance assumed is recognized based on information received from ceding companies.

An AFG subsidiary cedes life insurance policies to a third party on a funds withheld basis whereby the subsidiary retains the assets (securities) associated with the reinsurance contract. Interest is credited to the reinsurer based on the actual investment performance of the retained assets. This reinsurance contract is considered to contain an embedded derivative (that must be adjusted to fair value) because the yield on the payable is based on a specific block of the ceding company's assets, rather than the overall creditworthiness of the ceding company. AFG determined that changes in the fair value of the underlying portfolio of fixed maturity securities is an appropriate measure of the value of the embedded derivative. The securities related to this contract are classified as "trading." The adjustment to fair value on the embedded derivative offsets the investment income recorded on the adjustment to fair value of the related trading portfolio.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Deferred Policy Acquisition Costs (“DPAC”) Policy acquisition costs (principally commissions, premium taxes and certain underwriting and policy issuance costs) directly related to the successful acquisition or renewal of an insurance contract are deferred. DPAC also includes capitalized costs associated with sales inducements offered to fixed annuity policyholders such as enhanced interest rates and premium and persistency bonuses.

For the property and casualty companies, DPAC is limited based upon recoverability without any consideration for anticipated investment income and is charged against income ratably over the terms of the related policies. A premium deficiency is recognized if the sum of expected claims costs, claims adjustment expenses and unamortized acquisition costs exceed the related unearned premiums. A premium deficiency is first recognized by charging any unamortized acquisition costs to expense to the extent required to eliminate the deficiency. If the premium deficiency is greater than unamortized acquisition costs, a liability is accrued for the excess deficiency and reported with unpaid losses and loss adjustment expenses.

DPAC related to annuities is deferred to the extent deemed recoverable and amortized, with interest, in relation to the present value of actual and expected gross profits on the policies. Expected gross profits consist principally of estimated future investment margin (estimated future net investment income less interest credited on policyholder funds) and surrender, mortality, and other life and annuity policy charges, less death, annuitization and guaranteed withdrawal benefits in excess of account balances and estimated future policy administration expenses. To the extent that realized gains and losses result in adjustments to the amortization of DPAC related to annuities, such adjustments are reflected as components of realized gains (losses) on securities.

DPAC related to traditional life and health insurance is amortized over the expected premium paying period of the related policies, in proportion to the ratio of annual premium revenues to total anticipated premium revenues. See *“Life, Accident and Health Reserves”* below for details on the impact of loss recognition on the accounting for traditional life and health insurance contracts.

DPAC includes the present value of future profits on business in force of annuity and life, accident and health insurance companies acquired (“PVFP”). PVFP represents the portion of the costs to acquire companies that is allocated to the value of the right to receive future cash flows from insurance contracts existing at the date of acquisition. PVFP is amortized with interest in relation to expected gross profits of the acquired policies for annuities and universal life products and in relation to the premium paying period for traditional life and health insurance products.

DPAC and certain other balance sheet amounts related to annuity, long-term care and life businesses are also adjusted, net of tax, for the change in expense that would have been recorded if the unrealized gains (losses) from securities had actually been realized. These adjustments are included in unrealized gains (losses) on marketable securities, a component of AOCI in AFG’s Balance Sheet.

Managed Investment Entities A company is considered the primary beneficiary of, and therefore must consolidate, a variable interest entity (“VIE”) based primarily on its ability to direct the activities of the VIE that most significantly impact that entity’s economic performance and the obligation to absorb losses of, or receive benefits from, the entity that could potentially be significant to the VIE.

AFG manages, and has investments in, collateralized loan obligations (“CLOs”) that are VIEs (see *Note H — “Managed Investment Entities”*). AFG has determined that it is the primary beneficiary of the CLOs because (i) its role as asset manager gives it the power to direct the activities that most significantly impact the economic performance of the CLOs and (ii) through its investment in the CLO debt tranches, it has exposure to CLO losses (limited to the amount AFG invested) and the right to receive CLO benefits that could potentially be significant to the CLOs.

On January 1, 2016, AFG adopted ASU 2015-02, which amended certain consolidation accounting guidance, including the VIE guidance that applies to collateralized financing entities such as CLOs. The new guidance affects how fee arrangements with CLO asset managers impact the determination of the primary beneficiary of those entities. Due to the significance of AFG’s investments in the CLOs that it manages, the new guidance did not impact the consolidation of AFG’s currently outstanding CLOs. The new guidance also impacted the consolidation analysis that applies to limited partnerships and similar entities, but did not result in a change to the accounting for AFG’s existing investments in those entities.

Because AFG has no right to use the CLO assets and no obligation to pay the CLO liabilities, the assets and liabilities of the CLOs are shown separately in AFG’s Balance Sheet. AFG has elected the fair value option for reporting on the CLO assets and

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

liabilities to improve the transparency of financial reporting related to the CLOs. The net gain or loss from accounting for the CLO assets and liabilities at fair value is presented separately in AFG's Statement of Earnings.

Effective January 1, 2015, AFG adopted (on a modified retrospective basis) ASU 2014-13, which addresses the diversity in practice regarding the accounting for assets and liabilities of a consolidated collateralized financing entity (such as a CLO) when an election has been made to account for that entity's assets and liabilities at fair value. The fair values of a CLO's assets may differ from the separately measured fair values of its liabilities even though the CLO liabilities only have recourse to the CLO assets. Under the new guidance, AFG elected to set the carrying value of the CLO liabilities equal to the fair value of the CLO assets (which have more observable fair values) as an alternative to reporting those liabilities at a separately measured fair value. CLO earnings attributable to AFG's shareholders continue to be measured by the change in the fair value of AFG's investments in the CLOs and management fees earned.

Prior to the adoption of ASU 2014-13, measuring both the CLO assets and CLO liabilities at separately determined fair values resulted in a difference between the carrying value of the CLO assets and the carrying value of the CLO liabilities that was not attributable to AFG's ownership interest in the CLOs. This difference was recorded as "appropriated retained earnings — managed investment entities" in AFG's Balance Sheet. In accordance with the guidance adopted in 2015, the amount reported as "appropriated retained earnings — managed investment entities" at December 31, 2014 was reclassified to "liabilities of managed investment entities" on January 1, 2015 as the cumulative effect of an accounting change.

At March 31, 2016, assets and liabilities of managed investment entities included \$121 million in assets and \$91 million in liabilities of a temporary warehousing entity that was established in connection with the formation of a new CLO that is expected to close in May 2016. Upon closing, all warehoused assets are expected to be transferred to the new CLO and the liabilities will be repaid.

Unpaid Losses and Loss Adjustment Expenses The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims represent management's best estimate and are based upon (i) the accumulation of case estimates for losses reported prior to the close of the accounting period on direct business written; (ii) estimates received from ceding reinsurers and insurance pools and associations; (iii) estimates of unreported losses (including possible development on known claims) based on past experience; (iv) estimates based on experience of expenses for investigating and adjusting claims; and (v) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the statement of earnings in the period in which determined. Despite the variability inherent in such estimates, management believes that the liabilities for unpaid losses and loss adjustment expenses are adequate.

Annuity Benefits Accumulated Annuity receipts and benefit payments are recorded as increases or decreases in annuity benefits accumulated rather than as revenue and expense. Increases in this liability for interest credited are charged to expense and decreases for policy charges are credited to other income.

For certain products, annuity benefits accumulated also includes reserves for accrued persistency and premium bonuses, guaranteed withdrawals and excess benefits expected to be paid on future deaths and annuitizations ("EDAR"). The liabilities for EDAR and guaranteed withdrawals are accrued for and modified using assumptions consistent with those used in determining DPAC and DPAC amortization, except that amounts are determined in relation to the present value of total expected assessments. Total expected assessments consist principally of estimated future investment margin, surrender, mortality, and other life and annuity policy charges, and unearned revenues once they are recognized as income.

Annuity benefits accumulated also includes amounts advanced from the Federal Home Loan Bank of Cincinnati.

Unearned Revenue Certain upfront policy charges on annuities are deferred as unearned revenue (included in other liabilities) and recognized in net earnings (included in other income) using the same assumptions and estimated gross profits used to amortize DPAC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Life, Accident and Health Reserves Liabilities for future policy benefits under traditional life, accident and health policies are computed using the net level premium method. Computations are based on the original projections of investment yields, mortality, morbidity and surrenders and include provisions for unfavorable deviations unless a loss recognition event (premium deficiency) occurs. Claim reserves and liabilities established for accident and health claims are modified as necessary to reflect actual experience and developing trends.

For long-duration contracts (such as traditional life and long-term care policies), loss recognition occurs when, based on current expectations as of the measurement date, existing contract liabilities plus the present value of future premiums (including reasonably expected rate increases) are not expected to cover the present value of future claims payments and related settlement and maintenance costs (excluding overhead) as well as unamortized acquisition costs. If a block of business is determined to be in loss recognition, a charge is recorded in earnings in an amount equal to the excess of the present value of expected future claims costs and unamortized acquisition costs over existing reserves plus the present value of expected future premiums (with no provision for adverse deviation). The charge is recorded first to reduce unamortized acquisition costs and then as an additional reserve (if unamortized acquisition costs have been reduced to zero).

In addition, reserves for traditional life and long-term care policies are subject to adjustment for loss recognition charges that would have been recorded if the unrealized gains from securities had actually been realized. This adjustment is included in unrealized gains (losses) on marketable securities, a component of AOCI in AFG's Balance Sheet.

Debt Issuance Costs Debt issuance costs related to AFG's outstanding debt are amortized over the life of the related debt using the effective interest method. Effective January 1, 2016, AFG adopted (on a retrospective basis) ASU 2015-03, which requires debt issuance costs to be presented in the balance sheet as a direct reduction in the carrying value of long-term debt (consistent with the treatment of debt discounts) with the periodic amortization of such costs included in interest expense. Debt issuance costs related to AFG's revolving credit facilities will continue to be included in other assets in AFG's Balance Sheet. Prior to AFG's adoption of ASU 2015-03, AFG reported unamortized debt issuance costs as a deferred charge asset (included in other assets) in AFG's Balance Sheet and the periodic amortization was included in other expenses in AFG's Statement of Earnings. The updated guidance did not affect the overall recognition and measurement guidance for debt issuance costs. Accordingly, the guidance did not have an overall impact on AFG's Shareholders' Equity or results of operations.

Variable Annuity Assets and Liabilities Separate accounts related to variable annuities represent the fair value of deposits invested in underlying investment funds on which AFG earns a fee. Investment funds are selected and may be changed only by the policyholder, who retains all investment risk.

AFG's variable annuity contracts contain a guaranteed minimum death benefit ("GMDB") to be paid if the policyholder dies before the annuity payout period commences. In periods of declining equity markets, the GMDB may exceed the value of the policyholder's account. A GMDB liability is established for future excess death benefits using assumptions together with a range of reasonably possible scenarios for investment fund performance that are consistent with DPAC capitalization and amortization assumptions.

Premium Recognition Property and casualty premiums are earned generally over the terms of the policies on a pro rata basis. Unearned premiums represent that portion of premiums written which is applicable to the unexpired terms of policies in force. On reinsurance assumed from other insurance companies or written through various underwriting organizations, unearned premiums are based on information received from such companies and organizations. For traditional life, accident and health products, premiums are recognized as revenue when legally collectible from policyholders. For interest-sensitive life and universal life products, premiums are recorded in a policyholder account, which is reflected as a liability. Revenue is recognized as amounts are assessed against the policyholder account for mortality coverage and contract expenses.

Noncontrolling Interests For balance sheet purposes, noncontrolling interests represents the interests of shareholders other than AFG in consolidated entities. In the statement of earnings, net earnings and losses attributable to noncontrolling interests represents such shareholders' interest in the earnings and losses of those entities.

Income Taxes Deferred income taxes are calculated using the liability method. Under this method, deferred income tax assets and liabilities are determined based on differences between financial reporting and tax bases and are measured using enacted tax rates. A valuation allowance is established to reduce total deferred tax assets to an amount that will more likely than not be realized.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

AFG recognizes the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained under examination by the appropriate taxing authority. Interest and penalties on AFG's reserve for uncertain tax positions are recognized as a component of tax expense.

Stock-Based Compensation All share-based grants are recognized as compensation expense on a straight-line basis over their vesting periods based on their calculated fair value at the date of grant. AFG uses the Black-Scholes pricing model to measure the fair value of employee stock options.

Benefit Plans AFG provides retirement benefits to qualified employees of participating companies through the AFG 401(k) Retirement and Savings Plan, a defined contribution plan. AFG makes all contributions to the retirement fund portion of the plan and matches a percentage of employee contributions to the savings fund. Company contributions are expensed in the year for which they are declared. AFG and many of its subsidiaries provide health care and life insurance benefits to eligible retirees. AFG also provides postemployment benefits to former or inactive employees (primarily those on disability) who were not deemed retired under other company plans. The projected future cost of providing these benefits is expensed over the period employees earn such benefits.

Earnings Per Share Although basic earnings per share only considers shares of common stock outstanding during the period, the calculation of diluted earnings per share includes the following adjustments to weighted average common shares related to stock-based compensation plans: first three months of 2016 and 2015 — 1.6 million and 1.8 million, respectively.

AFG's weighted average diluted shares outstanding excludes the following anti-dilutive potential common shares related to stock compensation plans: first three months of 2016 and 2015 — 0.8 million and 1.3 million, respectively. Adjustments to net earnings attributable to shareholders in the calculation of diluted earnings per share were nominal in the 2016 and 2015 periods.

Statement of Cash Flows For cash flow purposes, "investing activities" are defined as making and collecting loans and acquiring and disposing of debt or equity instruments and property and equipment. "Financing activities" include obtaining resources from owners and providing them with a return on their investments, borrowing money and repaying amounts borrowed. Annuity receipts, surrenders, benefits and withdrawals are also reflected as financing activities. All other activities are considered "operating." Short-term investments having original maturities of three months or less when purchased are considered to be cash equivalents for purposes of the financial statements.

B. Sale of Business

On December 24, 2015, AFG completed the sale of substantially all of its run-off long-term care insurance business (which was included in the run-off long-term care and life segment) to HC2 Holdings, Inc. ("HC2") for an initial payment of \$7 million in cash and HC2 securities with a fair value of \$11 million (subject to post-closing adjustments). AFG may also receive up to \$13 million of additional proceeds from HC2 in the future contingent upon the release of certain statutory-basis liabilities of the legal entities sold by AFG. The legal entities involved in the transaction, United Teacher Associates Insurance Company ("UTA") and Continental General Insurance Company ("CGIC"), contained substantially all of AFG's long-term care insurance reserves (96% as measured by net statutory reserves as of November 30, 2015), as well as smaller blocks of annuity and life insurance business. Following the sale of these subsidiaries, AFG has only a small block of long-term care insurance (1,700 policies) with approximately \$35 million of reserves at March 31, 2016. AFG had ceased new sales of long-term care insurance in January 2010, but continued to service and accept renewal premiums on its outstanding policies, which are guaranteed renewable.

In addition to the \$18 million in cash and securities received at closing and the \$13 million of potential additional proceeds in the future from the release of statutory liabilities, AFG expects to receive a total of \$97 million in tax benefits related to the sale. AFG received approximately \$66 million of these tax benefits through reduced estimated tax payments in the first quarter of 2016 and just over \$30 million in April 2016 from a tax refund resulting from the carryback of the tax-basis capital loss. The receivables for the uncollected portion of these tax benefits are reflected in AFG's financial statements at March 31, 2016 and December 31, 2015.

Based on the status of ongoing negotiations at the end of the first quarter of 2015, management determined that the potential sale of the run-off long-term care insurance business met the GAAP "held for sale" criteria as of March 31, 2015. Accordingly, AFG recorded a \$162 million pretax loss (\$105 million loss after tax) in the first quarter of 2015 to establish a liability equal to the excess of the net carrying value of the assets and liabilities to be disposed over the estimated net sale proceeds. At the closing date, the loss was adjusted to \$166 million (\$108 million loss after tax) based on the actual proceeds received and the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

final carrying value of the net assets disposed. At March 31, 2015 and at the sale date, the carrying value of the assets and liabilities disposed represented approximately 4% of both AFG's assets and liabilities.

Revenues, costs and expenses, and earnings before income taxes for the subsidiaries sold were (in millions):

	Three months ended March 31, 2015
Life, accident and health net earned premiums:	
Long-term care	\$ 17
Life operations	3
Net investment income	18
Realized gains (losses) on securities and other income	(2)
Total revenues	36
Annuity benefits	2
Life, accident and health benefits:	
Long-term care	21
Life operations	3
Annuity and supplemental insurance acquisition expenses	3
Other expenses	4
Total costs and expenses	33
Earnings before income taxes	\$ 3

C. Segments of Operations

AFG manages its business as four segments: (i) Property and casualty insurance, (ii) Annuity, (iii) Run-off long-term care and life and (iv) Other, which includes holding company costs and the operations attributable to the noncontrolling interests of the managed investment entities.

AFG reports its property and casualty insurance business in the following Specialty sub-segments: (i) Property and transportation, which includes physical damage and liability coverage for buses, trucks and recreational vehicles, inland and ocean marine, agricultural-related products and other property coverages, (ii) Specialty casualty, which includes primarily excess and surplus, general liability, executive liability, professional liability, umbrella and excess liability, specialty coverage in targeted markets, customized programs for small to mid-sized businesses and workers' compensation insurance, and (iii) Specialty financial, which includes risk management insurance programs for leasing and financing institutions (including collateral and lender-placed mortgage property insurance), surety and fidelity products and trade credit insurance. Premiums and underwriting profit included under Other specialty represent business assumed by AFG's internal reinsurance program from the operations that make up AFG's other Specialty sub-segments and amortization of deferred gains on retroactive reinsurance transactions related to the sales of businesses in prior years. AFG's annuity business markets traditional fixed and fixed-indexed annuities in the retail, financial institutions and education markets. AFG's reportable segments and their components were determined based primarily upon similar economic characteristics, products and services.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Total earnings before income taxes	\$ 156	\$ 30

(a) AFG sold substantially all of its run-off long-term care insurance business in December 2015.

(b) Includes holding company interest and expenses.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

D. Fair Value Measurements

Accounting standards for measuring fair value are based on inputs used in estimating fair value. The three levels of the hierarchy are as follows:

Level 1 — Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). AFG's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available and short-term investments of managed investment entities.

Level 2 — Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. AFG's Level 2 financial instruments include separate account assets, corporate and municipal fixed maturity securities, mortgage-backed securities ("MBS") and investments of managed investment entities priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 — Valuations derived from market valuation techniques generally consistent with those used to estimate the fair values of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. AFG's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information, and prior to 2015 certain liabilities of the CLOs.

Under new guidance adopted in the first quarter of 2015, discussed in *Note A — "Accounting Policies — Managed Investment Entities,"* AFG has elected to set the carrying value of the CLO liabilities equal to the fair value of the CLO assets (which have more observable fair values) as an alternative to reporting those liabilities at separately measured fair values. Following the adoption of the new guidance, the CLO liabilities are categorized within the fair value hierarchy on the same basis (proportionally) as the related CLO assets. Since the portion of the CLO liabilities allocated to Level 3 is derived from the fair value of the CLO assets, these amounts are excluded from the progression of Level 3 financial instruments.

AFG's management is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. AFG's internal investment professionals are a group of approximately 25 analysts whose primary responsibility is to manage AFG's investment portfolio. These professionals monitor individual investments as well as overall industries and are active in the financial markets on a daily basis. The group is led by AFG's chief investment officer, who reports directly to one of AFG's Co-CEOs. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AFG's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, the Company communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

On December 24, 2015, AFG completed the sale of substantially all of its run-off long-term care insurance business. Based on the status of ongoing negotiations at the end of the first quarter of 2015, management determined that the potential sale of the run-off long-term care insurance business met GAAP "held for sale" criteria as of March 31, 2015. Accordingly, AFG recorded a loss in the first quarter of 2015 to write down the net carrying value of the assets and liabilities to be disposed to the estimated net sale proceeds of \$14 million (estimated fair value less costs to sell). The estimate of fair value used to determine that loss was derived using significant unobservable inputs (Level 3).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Assets and liabilities measured and carried at fair value in the financial statements are summarized below (in millions):

	Level 1	Level 2	Level 3	Total

(*) Variable annuity liabilities equal the fair value of variable annuity assets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Transfers between Level 1 and Level 2 for all periods presented were a result of increases or decreases in observable trade activity.

During the first three months of 2016, there was one perpetual preferred stock with a fair value of \$8 million that transferred from Level 2 to Level 1 and three perpetual preferred stocks with an aggregate fair value of \$6 million that transferred from Level 1 to Level 2. During the first three months of 2015, there was one common stock and two perpetual preferred stocks with aggregate fair values of \$53 million and \$5 million, respectively, transferred from Level 2 to Level 1. There were no transfers from Level 1 to Level 2 in the first three months of 2015.

Approximately 4% of the total assets carried at fair value on March 31, 2016, were Level 3 assets. Approximately 73% (\$1.29 billion) of the Level 3 assets were priced using non-binding broker quotes, for which there is a lack of transparency as to the inputs used to determine fair value. Details as to the quantitative inputs are neither provided by the brokers nor otherwise reasonably obtainable by AFG. Since internally developed Level 3 asset fair values represent less than 10% of AFG's shareholders' equity, any justifiable changes in unobservable inputs used to determine internally developed fair values would not have a material impact on AFG's financial position.

The only significant Level 3 assets or liabilities carried at fair value in the financial statements that were not measured using broker quotes are the derivatives embedded in AFG's fixed-indexed annuity liabilities, which are measured using a discounted cash flow approach and had a fair value of \$1.45 billion at March 31, 2016. The following table presents information about the unobservable inputs used by management in determining fair value of these embedded derivatives. See Note F — "Derivatives."

Unobservable Input	Range
Adjustment for insurance subsidiary's credit risk	0.20% – 3.20% over the risk free rate
Risk margin for uncertainty in cash flows	0.58% reduction in the discount rate
Surrenders	3% – 21% of indexed account value
Partial surrenders	2% – 10% of indexed account value
Annuitizations	0.25% – 1.0% of indexed account value
Deaths	1.5% – 4.0% of indexed account value
Budgeted option costs	1.75% – 3.5% of indexed account value

The range of adjustments for insurance subsidiary's credit risk reflects credit spread variations across the yield curve. The range of projected surrender rates reflects the specific surrender charges and other features of AFG's individual fixed-indexed annuity products with an expected range of 5% to 10% in the majority of future calendar years (3% to 18% over all periods). Increasing the budgeted option cost or risk margin for uncertainty in cash flows assumptions in the table above would increase the fair value of the fixed-indexed annuity embedded derivatives, while increasing any of the other unobservable inputs in the table above would decrease the fair value of the embedded derivatives.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Changes in balances of Level 3 financial assets and liabilities carried at fair value during the first three months of 2016 and 2015 are presented below (in millions). The transfers into and out of Level 3 were due to changes in the availability of market observable inputs. All transfers are reflected in the table at fair value as of the end of the reporting period.

(*) Excludes \$199 million and \$200 million of life contingent annuities in the payout phase at March 31, 2016 and December 31, 2015, respectively.

The carrying amount of cash and cash equivalents approximates fair value. Fair values for mortgage loans are estimated by discounting the future contractual cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings. The fair value of policy loans is estimated to approximate carrying value; policy loans have no defined maturity dates and are inseparable from insurance contracts. The fair value of annuity benefits was estimated based on expected cash flows discounted using forward interest rates adjusted for the Company's credit risk and includes the impact of maintenance expenses and capital costs. Fair values of long-term debt are based primarily on quoted market prices.

AMERICAN FINANCIAL GROUP, INC. 10-Q

The non-credit related portion of other-than-temporary impairment charges is included in other comprehensive income. Cumulative non-credit charges taken for securities still owned at March 31, 2016 and December 31, 2015, respectively, were \$201 million and \$205 million. Gross unrealized gains on such securities at March 31, 2016 and December 31, 2015 were \$126 million and \$134 million, respectively. Gross unrealized losses on such securities at March 31, 2016 and December 31, 2015 were \$9 million and \$6 million, respectively. These amounts represent the non-credit other-than-temporary impairment charges recorded in AOCI adjusted for subsequent changes in fair values and nearly all relate to residential MBS.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

The following tables show gross unrealized losses (dollars in millions) on fixed maturities and equity securities by investment category and length of time that individual securities have been in a continuous unrealized loss position at March 31, 2016 and December 31, 2015.

	Less Than Twelve Months			Twelve Months or More

Total equity securities	<u>\$ (82)</u>	<u>\$ 600</u>	88%	<u>\$ (3)</u>	<u>\$ 22</u>	88%

At March 31, 2016, the gross unrealized losses on fixed maturities of \$280 million relate to approximately 868 securities. Investment grade securities (as determined by nationally recognized rating agencies) represented approximately 57% of the gross unrealized loss and 79% of the fair value.

AFG analyzes its MBS securities for other-than-temporary impairment each quarter based upon expected future cash flows. Management estimates expected future cash flows based upon its knowledge of the MBS market, cash flow projections (which reflect loan to collateral values, subordination, vintage and geographic concentration) received from independent sources, implied cash flows inherent in security ratings and analysis of historical payment data. In the first three months of 2016, AFG recorded \$2 million in other-than-temporary impairment charges related to its residential MBS.

In the first three months of 2016, AFG recorded approximately \$14 million in other-than-temporary impairment charges related to corporate bonds.

AFG recorded \$38 million other-than-temporary impairment charges on common stocks in the first three months of 2016. At March 31, 2016, the gross unrealized losses on common stocks of \$81 million relate to 63 securities, one of which has been in an unrealized loss position for more than 12 months.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

AFG recorded \$3 million in other-than-temporary impairment charges on preferred stocks in the first three months of 2016. At March 31, 2016, the gross unrealized losses on preferred stocks of \$9 million relate to 24 securities. All of the preferred stocks that have been in an unrealized loss position for 12 months or more (3 securities), have investment grade ratings.

Management believes AFG will recover its cost basis in the securities with unrealized losses and that AFG has the ability to hold the securities until they recover in value and had no intent to sell them at March 31, 2016.

A progression of the credit portion of other-than-temporary impairments on fixed maturity securities for which the non-credit portion of an impairment has been recognized in other comprehensive income is shown below (in millions):

	2016	2015
Balance at January 1	\$ 160	\$ 170
Additional credit impairments on:		
Previously impaired securities	2	1
Securities without prior impairments	—	—
Reductions due to sales or redemptions	(2)	(3)
Balance at March 31	\$ 160	\$ 168

The table below sets forth the scheduled maturities of available for sale fixed maturities as of March 31, 2016 (dollars in millions). Securities with sinking funds are reported at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

Maturity	Amortized	Fair Value	
	Cost	Amount	%
One year or less	\$ 999	\$ 1,014	3%
After one year through five years	5,348	5,612	17%
After five years through ten years	11,678	12,025	35%
After ten years	3,998	4,232	13%
	22,023	22,883	68%
ABS (average life of approximately 5 years)	5,172	5,130	15%
MBS (average life of approximately 4-1/2 years)	5,554	5,908	17%
Total	\$ 32,749	\$ 33,921	100%

Certain risks are inherent in connection with fixed maturity securities, including loss upon default, price volatility in reaction to changes in interest rates, and general market factors and risks associated with reinvestment of proceeds due to prepayments or redemptions in a period of declining interest rates.

There were no investments in individual issuers that exceeded 10% of shareholders' equity at March 31, 2016 or December 31, 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

Net Unrealized Gain on Marketable Securities In addition to adjusting equity securities and fixed maturity securities classified as “available for sale” to fair value, GAAP requires that deferred policy acquisition costs and certain other balance sheet amounts related to annuity, long-term care and life businesses be adjusted to the extent that unrealized gains and losses from securities would result in adjustments to those balances had the unrealized gains or losses actually been realized. The following table shows (in millions) the components of the net unrealized gain on securities that is included in AOCI in AFG’s Balance Sheet.

	Pretax	Deferred Tax and Amounts Attributable to Noncontrolling Interests	Net
March 31, 2016			
Unrealized gain on:

(*) Primarily adjustments to deferred policy acquisition costs and reserves related to annuities and long-term care business.

Gross realized gains and losses (excluding impairment write-downs and mark-to-market of derivatives) on available for sale fixed maturity and equity security investment transactions included in the Statement of Cash Flows consisted of the following (in millions):

	Three months ended March 31,	
	2016	2015
Fixed maturities:		
Gross gains	\$ 14	\$ 5
Gross losses	(1)	—
Equity securities:		
Gross gains	25	21
Gross losses	—	—

F. Derivatives

As discussed under “Derivatives” in Note A — “Accounting Policies” to the financial statements, AFG uses derivatives in certain areas of its operations.

Derivatives That Do Not Qualify for Hedge Accounting The following derivatives that do not qualify for hedge accounting under GAAP are included in AFG’s Balance Sheet at fair value (in millions):

Derivative	Balance Sheet Line	March 31, 2016		December 31, 2015	
		Asset	Liability	Asset	Liability
MBS with embedded derivatives	Fixed maturities	\$ 127	\$ —	\$ 130	\$ —
Public company warrants	Equity securities	2	—	4	—
Fixed-indexed annuities (embedded derivative)	Annuity benefits accumulated	—	1,450	—	1,369
Equity index call options	Other investments	274	—	241	—
Reinsurance contracts (embedded derivative)	Other liabilities	—	10	—	7
		\$ 403	\$ 1,460	\$ 375	\$ 1,376

The MBS with embedded derivatives consist primarily of interest-only MBS with interest rates that float inversely with short-term rates. AFG records the entire change in the fair value of these securities in earnings. These investments are part of AFG’s overall investment strategy and represent a small component of AFG’s overall investment portfolio.

Warrants to purchase shares of publicly traded companies, which represent a small component of AFG’s overall investment portfolio, are considered to be derivatives that are required to be carried at fair value through earnings.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

AFG's fixed-indexed annuities, which represented approximately 60% of annuity benefits accumulated at March 31, 2016, provide policyholders with a crediting rate tied, in part, to the performance of an existing stock market index. AFG attempts to mitigate the risk in the index-based component of these products through the purchase of call options on the appropriate index. AFG receives collateral from its counterparties to support its purchased call option assets. This collateral (\$196 million at March 31, 2016 and \$211 million at December 31, 2015) is included in other assets in AFG's Balance Sheet with an offsetting liability to return the collateral, which is included in other liabilities. AFG's strategy is designed so that the change in the fair value of the call option assets will generally offset the economic change in the liabilities from the index participation. Both the index-based component of the annuities and the related call options are considered derivatives. Fluctuations in interest rates and the stock market, among other factors, can cause volatility in the periodic measurement of fair value of the embedded derivative that management believes can be inconsistent with the long-term economics of these products.

As discussed under "Reinsurance" in Note A to the financial statements, certain reinsurance contracts are considered to contain embedded derivatives.

The following table summarizes the gain (loss) included in AFG's Statement of Earnings for changes in the fair value of derivatives that do not qualify for hedge accounting for the first three months of 2016 and 2015 (in millions):

Derivative	Statement of Earnings Line	Three months ended March 31,	
		2016	2015
MBS with embedded derivatives	Realized gains on securities	\$ 1	\$ (2)
Public company warrants	Realized gains on securities	(2)	—
Fixed-indexed annuities (embedded derivative)	Annuity benefits	(17)	(50)
Equity index call options	Annuity benefits	(40)	20
Reinsurance contracts (embedded derivative)	Net investment income	(3)	—
		<u>\$ (61)</u>	<u>\$ (32)</u>

Derivatives Designated and Qualifying as Cash Flow Hedges As of March 31, 2016, AFG has entered into four interest rate swaps that are designated and qualify as highly effective cash flow hedges to mitigate interest rate risk related to certain floating-rate securities included in AFG's portfolio of fixed maturity securities. The purpose of each of these swaps is to effectively convert a portion of AFG's floating-rate fixed maturity securities to fixed rates by offsetting the variability in cash flows attributable to changes in short-term LIBOR.

Under the terms of the swaps, AFG receives fixed-rate interest payments in exchange for variable interest payments based on short-term LIBOR. The notional amounts of the interest rate swaps amortize down over each swap's respective life (the swaps expire between August 2019 and June 2030) in anticipation of the expected decline in AFG's portfolio of fixed maturity securities with floating interest rates based on short-term LIBOR. The total outstanding notional amount of AFG's interest rate swaps increased to \$749 million at March 31, 2016 compared to \$614 million at December 31, 2015, reflecting a \$163 million notional amount swap entered into in the first quarter of 2016, partially offset by the scheduled amortization discussed above. The fair value of the effective portion of the interest rate swaps in an asset position and included in other assets was \$13 million at March 31, 2016 and \$2 million at December 31, 2015. The fair value of the effective portion of the interest rate swaps in a liability position and included in other liabilities was zero at March 31, 2016 and less than \$1 million at December 31, 2015. The net unrealized gain or loss on cash flow hedges is included in AOCI, net of DPAC and tax. During the first three months of 2016 and 2015, \$2 million and \$1 million was reclassified from AOCI to net investment income, respectively. There was no ineffectiveness recorded in Net Earnings during these periods.

Derivative Designated and Qualifying as a Fair Value Hedge In June 2015, AFG entered into an interest rate swap to mitigate the interest rate risk associated with its fixed-rate 9-7/8% Senior Notes due June 2019 by effectively converting the interest rate on those notes to a floating rate of three-month LIBOR plus 8.099% (8.7329% at March 31, 2016). Since the terms of the interest rate swap match the terms of the hedged debt, changes in the fair value of the interest rate swap are offset by changes in the fair value of the hedged debt attributable to changes in interest rates. The fair value of the interest rate swap (asset of \$8 million and \$2 million at March 31, 2016 and December 31, 2015, respectively) and the offsetting adjustment to the carrying value of the 9-7/8% Senior Notes are both included in long-term debt on AFG's Balance Sheet. Accordingly, the net impact on AFG's current period earnings is that the interest expense associated with the hedged debt is effectively recorded at the floating rate. The net reduction in interest expense from the swap for the first three months of 2016 was \$1 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

G. Deferred Policy Acquisition Costs

A progression of deferred policy acquisition costs is presented below (in millions):

	P&C	Annuity and Run-off Long-term Care and Life						Consolidated Total
	Deferred Costs	Deferred Costs	Sales Inducements	PVFP	Subtotal	Unrealized	Total	
Balance at December 31, 2015	\$ 226	\$ 1,018	\$ 119	\$ 55	\$ 1,192	\$ (234)	\$ 958	\$ 1,184
Additions	132	68	5	—	73	—	73	205
Amortization:								
Periodic amortization	(134)	(25)	(5)	(2)	(32)	—	(32)	(166)
Included in realized gains	—	2	—	—	2	—	2	2
Change in unrealized	—	—	—	—	—	(170)	(170)	(170)
Balance at March 31, 2016	\$ 224	\$ 1,063	\$ 119	\$ 53	\$ 1,235	\$ (404)	\$ 831	\$ 1,055
Balance at December 31, 2014	\$ 221	\$ 925	\$ 132	\$ 74	\$ 1,131	\$ (531)	\$ 600	\$ 821
Additions	121	44	3	—	47	—	47	168
Amortization:								
Periodic amortization	(126)	(29)	(7)	(3)	(39)	—	(39)	(165)
Included in realized gains	—	2	—	—	2	—	2	2
Foreign currency translation	1	—	—	—	—	—	—	1
Change in unrealized	—	—	—	—	—	(71)	(71)	(71)
Balance at March 31, 2015	\$ 217	\$ 942	\$ 128	\$ 71	\$ 1,141	\$ (602)	\$ 539	\$ 756

The present value of future profits (“PVFP”) amounts in the table above are net of \$127 million and \$125 million of accumulated amortization at March 31, 2016 and December 31, 2015, respectively.

H. Managed Investment Entities

AFG is the investment manager and its subsidiaries have investments ranging from 15.0% to 86.1% of the most subordinate debt tranche of thirteen collateralized loan obligation entities or “CLOs,” which are considered variable interest entities. AFG’s subsidiaries also own portions of the senior debt tranches of certain of these CLOs. Upon formation between 2004 and 2015, these entities issued securities in various senior and subordinate classes and invested the proceeds primarily in secured bank loans, which serve as collateral for the debt securities issued by each particular CLO. None of the collateral was purchased from AFG. AFG’s investments in the subordinate debt tranches of these entities receive residual income from the CLOs only after the CLOs pay expenses (including management fees to AFG), and interest on and returns of capital to senior levels of debt securities. There are no contractual requirements for AFG to provide additional funding for these entities. AFG has not provided and does not intend to provide any financial support to these entities.

AFG’s maximum exposure to economic loss on its CLOs is limited to its investment in the CLOs, which had an aggregate fair value of \$250 million (including \$113 million invested in the most subordinate tranches) at March 31, 2016, and \$266 million at December 31, 2015.

During the first three months of 2016, AFG subsidiaries purchased \$11 million face amount of senior debt and subordinate tranches of existing CLOs for \$10 million. During the first three months of 2016 and 2015, AFG subsidiaries received \$23 million and \$1 million, respectively, in sale and redemption proceeds from its CLO investments.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

The revenues and expenses of the CLOs are separately identified in AFG's Statement of Earnings, after the elimination of management fees and earnings attributable to shareholders of AFG as measured by the change in the fair value of AFG's investments in the CLOs. See Note A — "Accounting Policies — Managed Investment Entities," for a discussion of accounting guidance adopted on January 1, 2015 that impacts the measurement of the fair value of CLO liabilities. Selected financial information related to the CLOs is shown below (in millions):

	Three months ended March 31,	
	2016	2015
Gains (losses) on change in fair value of assets/liabilities (a):		
Assets	\$ (1)	\$ 33
Liabilities	(12)	(36)
Management fees paid to AFG	4	4
CLO earnings (losses) attributable to AFG shareholders (b)	(7)	3

(a) Included in Revenues in AFG's Statement of Earnings.

(b) Included in Earnings before income taxes in AFG's Statement of Earnings.

The aggregate unpaid principal balance of the CLOs' fixed maturity investments exceeded the fair value of the investments by \$211 million and \$214 million at March 31, 2016 and December 31, 2015. The aggregate unpaid principal balance of the CLOs' debt exceeded its carrying value by \$242 million and \$205 million at those dates. The CLO assets include \$8 million and \$1 million in loans at March 31, 2016 and December 31, 2015, respectively, for which the CLOs are not accruing interest because the loans are in default (aggregate unpaid principal balance of \$21 million and \$10 million at those dates, respectively).

I. Goodwill and Other Intangibles

There were no changes in the goodwill balance of \$199 million during the first three months of 2016. Included in other assets in AFG's Balance Sheet is \$39 million at March 31, 2016 and \$41 million at December 31, 2015 in amortizable intangible assets related to property and casualty insurance acquisitions. These amounts are net of accumulated amortization of \$19 million and \$18 million, respectively. Amortization of intangibles was \$2 million in both the first three months of 2016 and 2015.

J. Long-Term Debt

Long-term debt consisted of the following (in millions):

	March 31, 2016			December 31, 2015		
	Principal	Debt Issue Costs	Carrying Value	Principal	Debt Issue Costs	Carrying Value
Direct Senior Obligations of AFG:						
9-7/8% Senior Notes due June 2019	\$ 350	\$ (1)	\$ 349	\$ 350	\$ (1)	\$ 349
6-3/8% Senior Notes due June 2042	230	(7)	223	230	(7)	223
5-3/4% Senior Notes due August 2042	125	(4)	121	125	(4)	121
Other	3	—	3	3	—	3
	<u>708</u>	<u>(12)</u>	<u>696</u>	<u>708</u>	<u>(12)</u>	<u>696</u>
Direct Subordinated Obligations of AFG:						
6-1/4% Subordinated Debentures due September 2054	150	(5)	145	150	(5)	145
6% Subordinated Debentures due November 2055	150	(5)	145	150	(5)	145

National Interstate bank credit facility	12	—	12	12	—	12
	<u>\$ 1,020</u>	<u>\$ (22)</u>	<u>\$ 998</u>	<u>\$ 1,020</u>	<u>\$ (22)</u>	<u>\$ 998</u>

To achieve a desired balance between fixed and variable rate debt, AFG entered into an interest rate swap in June 2015, which effectively converts its 9-7/8% Senior Notes to a floating rate of three-month LIBOR plus 8.099% (8.7329% at March 31, 2016 and 8.6110% at December 31, 2015). The fair value of the interest rate swap (asset of \$8 million and \$2 million at March 31,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

2016 and December 31, 2015, respectively) and the offsetting adjustment to the carrying value of the notes are both included in the carrying value of the 9-7/8% Senior Notes in the table above.

Scheduled principal payments on debt for the balance of 2016, the subsequent five years and thereafter were as follows:

2016 — none; 2017 — \$12 million; 2018 — none; 2019 — \$350 million; 2020 — none; 2021 — none and thereafter — \$658 million.

As shown below (principal amount, in millions), the majority of AFG's long-term debt is unsecured obligations of the holding company and its subsidiaries:

	March 31, 2016	December 31, 2015
Senior unsecured obligations	\$ 720	\$ 720
Subordinated unsecured obligations	300	300
	<u>\$ 1,020</u>	<u>\$ 1,020</u>

AFG can borrow up to \$500 million under its revolving credit facility which expires in December 2016. Amounts borrowed under this agreement bear interest at rates ranging from 1.00% to 1.875% (currently 1.375%) over LIBOR based on AFG's credit rating. No amounts were borrowed under this facility at March 31, 2016 or December 31, 2015.

National Interstate can borrow up to \$100 million under its unsecured credit agreement, which expires in November 2017. At March 31, 2016, there was \$12 million outstanding under this agreement, bearing interest at 1.399% (six-month LIBOR plus 0.875%).

K. Shareholders' Equity

AFG is authorized to issue 12.5 million shares of Voting Preferred Stock and 12.5 million shares of Nonvoting Preferred Stock, each without par value.

Accumulated Other Comprehensive Income, Net of Tax ("AOCI") Comprehensive income is defined as all changes in shareholders' equity except those arising from transactions with shareholders. Comprehensive income includes net earnings and other comprehensive income, which consists primarily of changes in net unrealized gains or losses on available for sale securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

The progression of the components of accumulated other comprehensive income follows (in millions):

	AOCI Beginning Balance	Other Comprehensive Income					AOCI Ending Balance
		Pretax	Tax	Net of tax	Attributable to noncontrolling interests	Attributable to shareholders	
Three months ended March 31, 2016							
Net unrealized gains on securities:							
Unrealized holding gains on securities arising during the period		\$ 192	\$ (67)	\$ 125	\$ (1)	\$ 124	
Reclassification adjustment for realized (gains) losses included in net earnings (a)		18	(7)	11	(1)	10	
Total net unrealized gains on securities (b)	\$ 332	210	(74)	136	(2)	134	\$ 466
Net unrealized gains on cash flow hedges	1	5	(2)	3	—	3	4
Foreign currency translation adjustments	(22)	3	3	6	—	6	(16)
Pension and other postretirement plans adjustments	(7)	1	—	1	—	1	(6)
Total	\$ 304	\$ 219	\$ (73)	\$ 146	\$ (2)	\$ 144	\$ 448
Three months ended March 31, 2015							
Net unrealized gains on securities:							
Unrealized holding gains on securities arising during the period		\$ 106	\$ (37)	\$ 69	\$ (1)	\$ 68	
Reclassification adjustment for realized (gains) losses included in net earnings (a)		(19)	7	(12)	—	(12)	
Total net unrealized gains on securities	\$ 743	87	(30)	57	(1)	56	\$ 799
Net unrealized gains on cash flow hedges	—	1	—	1	—	1	1
Foreign currency translation adjustments	(8)	(5)	(3)	(8)	—	(8)	(16)
Pension and other postretirement plans adjustments	(8)	—	—	—	—	—	(8)
Total	\$ 727	\$ 83	\$ (33)	\$ 50	\$ (1)	\$ 49	\$ 776

(a) The reclassification adjustment out of net unrealized gains on securities affected the following lines in AFG's Statement of Earnings:

OCI component	Affected line in the statement of earnings
Pretax	Realized gains (losses) on securities
Tax	Provision for income taxes
Attributable to noncontrolling interests	Net earnings (loss) attributable to noncontrolling interests

(b) Includes net unrealized gains of \$46 million at March 31, 2016 and \$51 million at December 31, 2015 related to securities for which only the credit portion of an other-than-temporary impairment has been recorded in earnings.

Stock Incentive Plans Under AFG's stock incentive plans, employees of AFG and its subsidiaries are eligible to receive equity awards in the form of stock options, stock appreciation rights, restricted stock awards, restricted stock units and stock awards. In the first three months of 2016, AFG issued 317,230 shares of restricted Common Stock (fair value of \$66.97 per share) under the Stock Incentive Plan. In addition, AFG issued 40,336 shares of Common Stock (fair value of \$71.05 per share) in the first quarter of 2016 under the Equity Bonus Plan. AFG did not grant any stock options in the first three months of 2016.

Total compensation expense related to stock incentive plans of AFG and its subsidiaries was \$8 million and \$6 million in the first three months of 2016 and 2015, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — CONTINUED

L. Income Taxes

The following is a reconciliation of income taxes at the statutory rate of 35% to the provision for income taxes as shown in AFG's Statement of Earnings (dollars in millions):

	Three months ended March 31,			
	2016		2015	
	Amount	% of EBT	Amount	% of EBT
Earnings before income taxes ("EBT")	\$ 156		\$ 30	
Income taxes at statutory rate	\$ 55	35%	\$ 10	35%
Effect of:				
Tax exempt interest	(7)	(4%)	(7)	(23%)
Change in valuation allowance	1	1%	(1)	(3%)
Subsidiaries not in AFG's tax return	1	—%	1	3%
Other	2	1%	2	5%
Provision for income taxes as shown in the statement of earnings	\$ 52	33%	\$ 5	17%

During the first three months of 2016, there were no material changes to AFG's liability for uncertain tax positions. Excluding the tax benefit from the estimated loss on the sale of the long-term care insurance business, AFG's effective tax rate was 32% for the first three months of 2015.

M. Contingencies

There have been no significant changes to the matters discussed and referred to in *Note M — "Contingencies"* of AFG's 2015 Form 10-K, which covers property and casualty insurance reserves for claims related to environmental exposures, asbestos and other mass tort claims and environmental and occupational injury and disease claims of former subsidiary railroad and manufacturing operations, as well as contingencies related to the sale of substantially all of AFG's run-off long-term care insurance business.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. Some of the forward-looking statements can be identified by the use of words such as “anticipates”, “believes”, “expects”, “projects”, “estimates”, “intends”, “plans”, “seeks”, “could”, “may”, “should”, “will” or the negative version of those words or other comparable terminology. Such forward-looking statements include statements relating to: expectations concerning market and other conditions and their effect on future premiums, revenues, earnings, investment activities, and the amount and timing of share repurchases; recoverability of asset values; expected losses and the adequacy of reserves for asbestos, environmental pollution and mass tort claims; rate changes; and improved loss experience.

Actual results and/or financial condition could differ materially from those contained in or implied by such forward-looking statements for a variety of reasons including but not limited to:

- changes in financial, political and economic conditions, including changes in interest and inflation rates, currency fluctuations and extended economic recessions or expansions in the U.S. and/or abroad;
- performance of securities markets;
- AFG’s ability to estimate accurately the likelihood, magnitude and timing of any losses in connection with investments in the non-agency residential mortgage market;
- new legislation or declines in credit quality or credit ratings that could have a material impact on the valuation of securities in AFG’s investment portfolio;
- the availability of capital;
- regulatory actions (including changes in statutory accounting rules);
- changes in the legal environment affecting AFG or its customers;
- tax law and accounting changes;
- levels of natural catastrophes and severe weather, terrorist activities (including any nuclear, biological, chemical or radiological events), incidents of war or losses resulting from civil unrest and other major losses;
- development of insurance loss reserves and establishment of other reserves, particularly with respect to amounts associated with asbestos and environmental claims;
- availability of reinsurance and ability of reinsurers to pay their obligations;
- trends in persistency, mortality and morbidity;
- competitive pressures;
- the ability to obtain adequate rates and policy terms; and
- changes in AFG’s credit ratings or the financial strength ratings assigned by major ratings agencies to AFG’s operating subsidiaries.

The forward-looking statements herein are made only as of the date of this report. The Company assumes no obligation to publicly update any forward-looking statements.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued**OVERVIEW****Financial Condition**

AFG is organized as a holding company with almost all of its operations being conducted by subsidiaries. AFG, however, has continuing cash needs for administrative expenses, the payment of principal and interest on borrowings, shareholder dividends, and taxes. Therefore, certain analyses are most meaningfully presented on a parent only basis while others are best done on a total enterprise basis. In addition, because most of its businesses are financial in nature, AFG does not prepare its consolidated financial statements using a current-noncurrent format. Consequently, certain traditional ratios and financial analysis tests are not meaningful.

Results of Operations

Through the operations of its subsidiaries, AFG is engaged primarily in property and casualty insurance, focusing on specialized commercial products for businesses and in the sale of fixed and fixed-indexed annuities in the retail, financial institutions and education markets.

Net earnings attributable to AFG's shareholders for the first three months of 2016 were \$101 million (\$1.14 per share, diluted) compared to \$19 million (\$0.21 per share, diluted) reported in the same period of 2015, reflecting:

- higher underwriting profit and net investment income in the property and casualty insurance segment,
- lower operating earnings in the annuity segment due to the impact of fair value accounting for fixed-indexed annuities and the run-off of higher yielding investments,
- realized losses on securities in the first three months of 2016 compared to realized gains on securities in the first three months of 2015, and
- the first quarter 2015 estimated loss on the sale of substantially all of AFG's run-off long-term care insurance business, which was completed in December 2015.

CRITICAL ACCOUNTING POLICIES

Significant accounting policies are summarized in *Note A — "Accounting Policies"* to the financial statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that can have a significant effect on amounts reported in the financial statements. As more information becomes known, these estimates and assumptions change and, thus, impact amounts reported in the future. The areas where management believes the degree of judgment required to determine amounts recorded in the financial statements is most significant are as follows:

- the establishment of insurance reserves, especially asbestos and environmental-related reserves,
- the recoverability of reinsurance,
- the recoverability of deferred acquisition costs,
- the establishment of asbestos and environmental reserves of former railroad and manufacturing operations, and
- the valuation of investments, including the determination of "other-than-temporary" impairments.

For a discussion of these policies, see *Management's Discussion and Analysis — "Critical Accounting Policies"* in AFG's 2015 Form 10-K.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
LIQUIDITY AND CAPITAL RESOURCES

Ratios AFG's debt to total capital ratio on a consolidated basis is shown below (dollars in millions):

	March 31, 2016	December 31,	
		2015	2014
Principal amount of long-term debt	\$ 1,020	\$ 1,020	\$ 1,061
Total capital	5,531	5,512	5,513
Ratio of debt to total capital:			
Including subordinated debt and debt secured by real estate	18.4%	18.5%	19.2%
Excluding subordinated debt and debt secured by real estate	13.0%	13.1%	15.6%

The ratio of debt to total capital is a non-GAAP measure that management believes is useful for investors, analysts and independent ratings agencies to evaluate AFG's financial strength and liquidity and to provide insight into how AFG finances its operations. The ratio is calculated by dividing the principal amount of AFG's long-term debt by its total capital, which includes long-term debt, noncontrolling interests and shareholders' equity (excluding unrealized gains (losses) related to fixed maturity investments and appropriated retained earnings related to managed investment entities).

AFG's ratio of earnings to fixed charges, including annuity benefits as a fixed charge, was 1.59 for the three months ended March 31, 2016 and 1.66 for the year ended December 31, 2015. Excluding annuity benefits, this ratio was 7.21 and 6.58, respectively. Although the ratio excluding annuity benefits is not required or encouraged to be disclosed under Securities and Exchange Commission rules, it is presented because interest credited to annuity policyholder accounts is not always considered a borrowing cost for an insurance company.

Condensed Consolidated Cash Flows AFG's principal sources of cash include insurance premiums, income from its investment portfolio and proceeds from the maturities, redemptions and sales of investments. Insurance premiums in excess of acquisition expenses and operating costs are invested until they are needed to meet policyholder obligations or made available to the parent company through dividends to cover debt obligations and corporate expenses, and to provide returns to shareholders through share repurchases and dividends. AFG's cash flows from operating, investing and financing activities as detailed in its Consolidated Statement of Cash Flows are shown below (in millions):

	Three months ended March 31,	
	2016	2015
Net cash provided by operating activities	\$ 335	\$ 397
Net cash used in investing activities	(1,196)	(968)
Net cash provided by financing activities	872	440
Net change in cash and cash equivalents	\$ 11	\$ (131)

Net Cash Provided by Operating Activities AFG's property and casualty insurance operations typically produce positive net operating cash flows as premiums collected and investment income exceed policy acquisition costs, claims payments and operating expenses. AFG's net cash provided by operating activities is impacted by the level and timing of property and casualty premiums, claim and expense payments and recoveries from reinsurers. AFG's annuity operations typically produce positive net operating cash flows as investment income exceeds acquisition costs and operating expenses. Interest credited on annuity policyholder funds is a non-cash increase in AFG's annuity benefits accumulated liability and annuity premiums, benefits and withdrawals are considered financing activities due to the deposit-type nature of annuities. Net cash provided by operating activities was \$335 million for the first three months of 2016 compared to \$397 million in the first three months of 2015, a decrease of \$62 million.

Net Cash Used in Investing Activities AFG's investing activities consist primarily of the investment of funds provided by its property and casualty and annuity products. Net cash used in investing activities was \$1.20 billion for the first three months of 2016 compared to \$968 million in the first three months of 2015, an increase of \$228 million. The \$561 million increase in net cash flows from annuity policyholders in the first three months of 2016 as compared to the 2015 period (discussed below under net cash provided by financing activities) increased the amount of cash available for investment in the first three months of 2016 compared to the 2015 period. However, cash on hand in the annuity and run-off long-term care and life segments increased by \$23 million during the first three months of 2016 as the net cash flows received from annuity policyholders

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

outpaced the investment of the funds during that period compared to a \$71 million decrease in cash on hand in these segments during the first three months of 2015 as the investment of funds outpaced the net cash flows received from annuity policyholders. In addition to the investment of funds provided by the insurance operations, investing activities also include the purchase and disposal of managed investment entity investments (collateralized loan obligations), which are presented separately in AFG's Balance Sheet. Net investment activity in the managed investment entities was a \$51 million source of cash in the first three months of 2016 compared to a \$109 million use of cash in the 2015 period, accounting for a \$160 million decrease in net cash used in investing activities in the first three months of 2016 compared to the 2015 period. See *Note A — "Accounting Policies — Managed Investment Entities"* and *Note H — "Managed Investment Entities"* to the financial statements.

Net Cash Provided by Financing Activities AFG's financing activities consist primarily of transactions with annuity policyholders, issuances and retirements of long-term debt, repurchases of common stock and dividend payments. Net cash provided by financing activities was \$872 million for the first three months of 2016 compared to \$440 million in the first three months of 2015, an increase of \$432 million. Annuity receipts exceeded annuity surrenders, benefits, withdrawals and transfers by \$941 million in the first three months of 2016 compared to \$380 million in the first three months of 2015, resulting in a \$561 million increase in net cash provided by financing activities in the 2016 period compared to the 2015 period. During the first three months of 2016, AFG repurchased \$76 million of its Common Stock compared to \$31 million repurchased in the first three months of 2015, which accounted for a \$45 million decrease in net cash provided by financing activities in the 2016 period compared to the 2015 period. Financing activities also include issuances and retirements of managed investment entity liabilities, which are nonrecourse to AFG and presented separately in AFG's Balance Sheet. Issuances of managed investment entity liabilities exceeded retirements by \$20 million in the first three months of 2016 compared to \$99 million in the first three months of 2015, accounting for a \$79 million decrease in net cash provided by financing activities in the 2016 period compared to the 2015 period. See *Note A — "Accounting Policies — Managed Investment Entities"* and *Note H — "Managed Investment Entities"* to the financial statements.

Parent and Subsidiary Liquidity

Parent Holding Company Liquidity Management believes AFG has sufficient resources to meet its liquidity requirements. If funds generated from operations, including dividends, tax payments and borrowings from subsidiaries, are insufficient to meet fixed charges in any period, AFG would be required to utilize parent company cash and marketable securities or to generate cash through borrowings, sales of other assets, or similar transactions.

AFG can borrow up to \$500 million under its revolving credit facility which expires in December 2016. Amounts borrowed under this agreement bear interest at rates ranging from 1.00% to 1.875% (currently 1.375%) over LIBOR based on AFG's credit rating. AFG expects to replace this credit facility prior to expiration with a new five-year revolving credit facility with similar terms. There were no borrowings under this agreement, or under any other parent company short-term borrowing arrangements, during 2015 or the first three months of 2016.

During the first three months of 2016, AFG repurchased 1.1 million shares of its Common Stock for \$76 million. During 2015, AFG repurchased 2.0 million shares of its Common Stock for \$126 million.

Under a tax allocation agreement with AFG, its 80%-owned U.S. subsidiaries generally pay taxes to (or recover taxes from) AFG based on each subsidiary's contribution to amounts due under AFG's consolidated tax return.

Subsidiary Liquidity In March 2016, Great American Insurance Company ("GAI"), AFG's wholly-owned property and casualty insurance subsidiary, proposed to acquire all of the outstanding common shares of National Interstate Corporation ("NATL") that it does not currently own for approximately \$293 million (\$30.00 per share). NATL is a 51%-owned property and casualty insurance subsidiary of GAI.

Great American Life Insurance Company ("GALIC"), a wholly-owned annuity subsidiary, is a member of the Federal Home Loan Bank of Cincinnati ("FHLB"). The FHLB makes advances and provides other banking services to member institutions, which provides the annuity operations with a substantial additional source of liquidity. These advances further the FHLB's mission of improving access to housing by increasing liquidity in the residential mortgage-backed securities market. At March 31, 2016, GALIC had \$935 million in outstanding advances from the FHLB (included in annuity benefits accumulated), bearing interest at rates ranging from 0.02% to 0.49% over LIBOR (average rate of 0.77% at March 31, 2016). While these advances must be repaid between 2016 and 2021 (\$200 million in 2016, \$285 million in 2018, \$300 million in 2020 and \$150 million in 2021), GALIC has the option to prepay all or a portion of the advances. GALIC has invested the proceeds from

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

the advances in fixed maturity securities with similar expected lives as the advances for the purpose of earning a spread over the interest payments due to the FHLB. At March 31, 2016, GALIC estimated that it had additional borrowing capacity of approximately \$600 million from the FHLB.

NATL can borrow up to \$100 million under its unsecured credit agreement, which expires in November 2017. There was \$12 million borrowed under this agreement at March 31, 2016, bearing interest at 1.399% (six-month LIBOR plus 0.875%).

The liquidity requirements of AFG's insurance subsidiaries relate primarily to the liabilities associated with their products as well as operating costs and expenses, payments of dividends and taxes to AFG and contributions of capital to their subsidiaries. Historically, cash flows from premiums and investment income have generally provided more than sufficient funds to meet these requirements. Funds received in excess of cash requirements are generally invested in additional marketable securities. In addition, the insurance subsidiaries generally hold a significant amount of highly liquid, short-term investments.

The excess cash flow of AFG's property and casualty group allows it to extend the duration of its investment portfolio somewhat beyond that of its claim reserves.

In the annuity business, where profitability is largely dependent on earning a spread between invested assets and annuity liabilities, the duration of investments is generally maintained close to that of liabilities. In a rising interest rate environment, significant protection from withdrawals exists in the form of temporary and permanent surrender charges on AFG's annuity products. With declining rates, AFG receives some protection (from spread compression) due to the ability to lower crediting rates, subject to contractually guaranteed minimum interest rates ("GMIRs"). AFG began selling policies with GMIRs below 2% in 2003; almost all new business since late 2010 has been issued with a 1% GMIR. At March 31, 2016, AFG could reduce the average crediting rate on approximately \$20 billion of traditional fixed and fixed-indexed deferred annuities without guaranteed withdrawal benefits by approximately 75 basis points (on a weighted average basis). Annuity policies are subject to GMIRs at policy issuance. The table below shows the breakdown of annuity reserves by GMIR. The current interest crediting rates on substantially all of AFG's annuities with a GMIR of 3% or higher are at their minimum.

GMIR	% of Reserves at March 31,	
	2016	2015
1 — 1.99%	69%	61%
2 — 2.99%	7%	9%
3 — 3.99%	13%	17%
4.00% and above	11%	13%
Annuity benefits accumulated (in millions)	<u>\$27,812</u>	<u>\$24,411</u>

AFG believes its insurance subsidiaries maintain sufficient liquidity to pay claims and benefits and operating expenses. In addition, these subsidiaries have sufficient capital to meet commitments in the event of unforeseen events such as reserve deficiencies, inadequate premium rates or reinsurer insolvencies. Nonetheless, changes in statutory accounting rules, significant declines in the fair value of the insurance subsidiaries' investment portfolios or significant ratings downgrades on these investments, could create a need for additional capital.

Investments AFG's investment portfolio at March 31, 2016, contained \$33.92 billion in fixed maturity securities and \$1.54 billion in equity securities classified as available for sale and carried at fair value with unrealized gains and losses included in a separate component of shareholders' equity on an after-tax basis. In addition, \$249 million in fixed maturities and \$112 million in equity securities were classified as trading with changes in unrealized holding gains or losses included in net investment income.

Fair values for AFG's portfolio are determined by AFG's internal investment professionals using data from nationally recognized pricing services as well as non-binding broker quotes. Fair values of equity securities are generally based on published closing prices. For mortgage-backed securities ("MBS"), which comprise approximately 17% of AFG's fixed maturities, prices for each security are generally obtained from both pricing services and broker quotes. For the remainder of AFG's fixed maturity portfolio, approximately 80% are priced using pricing services and the balance is priced primarily by using non-binding broker quotes. When prices obtained for the same security vary, AFG's internal investment professionals select the price they believe is most indicative of an exit price.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

The pricing services use a variety of observable inputs to estimate fair value of fixed maturities that do not trade on a daily basis. Based upon information provided by the pricing services, these inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data, and measures of volatility. Included in the pricing of MBS are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Due to the lack of transparency in the process that brokers use to develop prices, valuations that are based on brokers' prices are classified as Level 3 in the GAAP hierarchy unless the price can be corroborated, for example, by comparison to similar securities priced using observable inputs.

Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AFG's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AFG communicates directly with pricing services regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the services to value specific securities.

In general, the fair value of AFG's fixed maturity investments is inversely correlated to changes in interest rates. The following table demonstrates the sensitivity of such fair values to reasonably likely changes in interest rates by illustrating the estimated effect on AFG's fixed maturity portfolio and accumulated other comprehensive income that an immediate increase of 100 basis points in the interest rate yield curve would have at March 31, 2016 (dollars in millions). Effects of increases or decreases from the 100 basis points illustrated would be approximately proportional.

Fair value of fixed maturity portfolio	\$	34,170
Percentage impact on fair value of 100 bps increase in interest rates		(5.0%)
Pretax impact on fair value of fixed maturity portfolio	\$	(1,709)
Offsetting adjustments to deferred policy acquisition costs and other balance sheet amounts		750
Estimated pretax impact on accumulated other comprehensive income		(959)
Deferred income tax		334
Noncontrolling interests		13
Estimated after-tax impact on accumulated other comprehensive income	\$	(612)

Approximately 88% of the fixed maturities held by AFG at March 31, 2016, were rated "investment grade" (credit rating of AAA to BBB) by nationally recognized rating agencies. Investment grade securities generally bear lower yields and lower degrees of risk than those that are unrated and non-investment grade. Management believes that the high quality investment portfolio should generate a stable and predictable investment return.

MBS are subject to significant prepayment risk due to the fact that, in periods of declining interest rates, mortgages may be repaid more rapidly than scheduled as borrowers refinance higher rate mortgages to take advantage of lower rates. Although interest rates have been low in recent years, tighter lending standards have resulted in fewer buyers being able to refinance the mortgages underlying much of AFG's non-agency residential MBS portfolio.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Summarized information for AFG's MBS (including those classified as trading) at March 31, 2016, is shown in the table below (dollars in millions). Agency-backed securities are those issued by a U.S. government-backed agency; Alt-A mortgages are those with risk profiles between prime and subprime. The majority of the Alt-A securities and substantially all of the subprime securities are backed by fixed-rate mortgages. The average life of the residential and commercial MBS is approximately 5 years and 3 years, respectively.

Collateral type	Amortized Cost	Fair Value	Fair Value as % of Cost	Unrealized Gain (Loss)	% Rated Investment Grade
Residential:					
Agency-backed	\$ 203	\$ 209	103%	\$ 6	100%
Non-agency prime	1,566	1,721	110%	155	34%
Alt-A	991	1,060	107%	69	14%
Subprime	753	787	105%	34	23%
Commercial	2,046	2,136	104%	90	99%
	<u>\$ 5,559</u>	<u>\$ 5,913</u>	106%	<u>\$ 354</u>	55%

The National Association of Insurance Commissioners ("NAIC") assigns creditworthiness designations on a scale of 1 to 6 with 1 being the highest quality and 6 being the lowest quality. The NAIC retains third-party investment management firms to assist in the determination of appropriate NAIC designations for mortgage-backed securities based not only on the probability of loss (which is the primary basis of ratings by the major ratings firms), but also on the severity of loss and statutory carrying value. At March 31, 2016, 98% (based on statutory carrying value of \$5.49 billion) of AFG's MBS securities had a NAIC designation of 1.

Municipal bonds represented approximately 21% of AFG's fixed maturity portfolio at March 31, 2016. AFG's municipal bond portfolio is high quality, with 98% of the securities rated investment grade at that date. The portfolio is well diversified across the states of issuance and individual issuers. At March 31, 2016, approximately 75% of the municipal bond portfolio was held in revenue bonds, with the remaining 25% held in general obligation bonds. General obligation securities of California, Illinois, Michigan, New Jersey, New York and Puerto Rico collectively represented approximately 1% of this portfolio.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Summarized information for the unrealized gains and losses recorded in AFG's Balance Sheet at March 31, 2016, is shown in the following table (dollars in millions). Approximately \$689 million of available for sale fixed maturity securities and \$94 million of available for sale equity securities had no unrealized gains or losses at March 31, 2016.

	Securities With Unrealized Gains	Securities With Unrealized Losses
Available for Sale Fixed Maturities		
Fair value of securities	\$ 26,619	\$ 6,613
Amortized cost of securities	\$ 25,167	\$ 6,893
Gross unrealized gain (loss)	\$ 1,452	\$ (280)
Fair value as % of amortized cost	106%	96%
Number of security positions	4,260	868
Number individually exceeding \$2 million gain or loss	81	28
Concentration of gains (losses) by type or industry (exceeding 5% of unrealized):		
Mortgage-backed securities	\$ 381	\$ (27)
States and municipalities	369	(8)
Banks, savings and credit institutions	124	(20)
Gas and electric services	77	(26)
Asset-backed securities	29	(71)
Oil and gas extraction	11	(49)
Metal mining	5	(17)
Percentage rated investment grade	91%	79%
Available for Sale Equity Securities		
Fair value of securities	\$ 803	\$ 639
Cost of securities	\$ 652	\$ 729
Gross unrealized gain (loss)	\$ 151	\$ (90)
Fair value as % of cost	123%	88%
Number of security positions	145	87
Number individually exceeding \$2 million gain or loss	22	15

The table below sets forth the scheduled maturities of AFG's available for sale fixed maturity securities at March 31, 2016, based on their fair values. Securities with sinking funds are reported at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

	Securities With Unrealized Gains	Securities With Unrealized Losses
Maturity		
One year or less	3%	1%
After one year through five years	19%	6%
After five years through ten years	38%	28%
After ten years	14%	6%
	74%	41%
Asset-backed securities (average life of approximately 5 years)	8%	43%
Mortgage-backed securities (average life of approximately 4-1/2 years)	18%	16%
	100%	100%

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

The table below (dollars in millions) summarizes the unrealized gains and losses on fixed maturity securities by dollar amount:

	Aggregate Fair Value	Aggregate Unrealized Gain (Loss)	Fair Value as % of Cost Basis
Fixed Maturities at March 31, 2016			
Securities with unrealized gains:			
Exceeding \$500,000 (893 securities)	\$ 11,715	\$ 958	109%
\$500,000 or less (3,367 securities)	14,904	494	103%
	<u>\$ 26,619</u>	<u>\$ 1,452</u>	106%
Securities with unrealized losses:			
Exceeding \$500,000 (135 securities)	\$ 1,629	\$ (192)	89%
\$500,000 or less (733 securities)	4,984	(88)	98%
	<u>\$ 6,613</u>	<u>\$ (280)</u>	96%

The following table (dollars in millions) summarizes the unrealized losses for all securities with unrealized losses by issuer quality and the length of time those securities have been in an unrealized loss position:

	Aggregate Fair Value	Aggregate Unrealized Loss	Fair Value as % of Cost Basis
Securities with Unrealized Losses at March 31, 2016			
Investment grade fixed maturities with losses for:			
Less than one year (475 securities)	\$ 4,405	\$ (134)	97%
One year or longer (137 securities)	846	(27)	97%
	<u>\$ 5,251</u>	<u>\$ (161)</u>	97%

	<u>\$ 500</u>	<u>\$ (81)</u>	86%
Perpetual preferred stocks with losses for:			
Less than one year (21 securities)	\$ 117	\$ (5)	96%
One year or longer (3 securities)	22	(4)	85%
	<u>\$ 139</u>	<u>\$ (9)</u>	94%

When a decline in the value of a specific investment is considered to be “other-than-temporary,” a provision for impairment is charged to earnings (accounted for as a realized loss) and the cost basis of that investment is reduced by the amount of the charge. The determination of whether unrealized losses are “other-than-temporary” requires judgment based on subjective as well as objective factors as detailed in AFG’s 2015 Form 10-K under *Management’s Discussion and Analysis — “Investments.”*

Based on its analysis, management believes AFG will recover its cost basis in the securities with unrealized losses and that AFG has the ability to hold the securities until they recover in value and had no intent to sell them at March 31, 2016. Although AFG has the ability to continue holding its investments with unrealized losses, its intent to hold them may change due to deterioration in the issuers’ creditworthiness, decisions to lessen exposure to a particular issuer or industry, asset/liability management decisions, market movements, changes in views about appropriate asset allocation or the desire to offset taxable realized gains. Should AFG’s ability or intent change with regard to a particular security, a charge for impairment would likely be required. While it is not possible to accurately predict if or when a specific security will become impaired, charges for other-than-temporary impairment could be material to results of operations in future periods. Significant declines in the fair value of

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

AFG's investment portfolio could have a significant adverse effect on AFG's liquidity. For information on AFG's realized gains (losses) on securities, including charges for "other-than-temporary" impairment, see "Results of Operations — Consolidated Realized Gains (Losses) on Securities."

Uncertainties Management believes that the areas posing the greatest risk of material loss are the adequacy of its insurance reserves and contingencies arising out of its former railroad and manufacturing operations. See *Management's Discussion and Analysis* — "Uncertainties" in AFG's 2015 Form 10-K.

MANAGED INVESTMENT ENTITIES

Accounting standards require AFG to consolidate its investments in collateralized loan obligation ("CLO") entities that it manages and owns an interest in (in the form of debt). See *Note A — Accounting Policies — Managed Investment Entities* and *Note H — Managed Investment Entities* to the financial statements. The effect of consolidating these entities is shown in the tables below (in millions). The "Before CLO Consolidation" columns include AFG's investment and earnings in the CLOs on an unconsolidated basis.

(a) Includes losses of \$7 million in the first three months of 2016 and income of \$3 million in the first three months of 2015 representing the change in fair value of AFG's CLO investments plus \$4 million in both periods in CLO management fees earned.

(b) Elimination of the change in fair value of AFG's investments in the CLOs, including \$7 million and \$6 million in the first three months of 2016 and 2015, respectively, in distributions recorded as interest expense by the CLOs.

(c) Elimination of management fees earned by AFG.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued**RESULTS OF OPERATIONS**

General AFG's net earnings attributable to shareholders, determined in accordance with GAAP, include certain items that may not be indicative of its ongoing core operations. The following table identifies such items and reconciles net earnings attributable to shareholders to core net operating earnings, a non-GAAP financial measure that AFG believes is a useful tool for investors and analysts in analyzing ongoing operating trends (in millions, except per share amounts):

	Three months ended March 31,	
	2016	2015
Core net operating earnings	\$ 111	\$ 112
Realized gains (losses) on securities (*)	(10)	12
Realized loss on subsidiaries (*)	—	(105)
Net earnings attributable to shareholders	\$ 101	\$ 19
Diluted per share amounts:		
Core net operating earnings	\$ 1.25	\$ 1.25
Realized gains (losses) on securities	(0.11)	0.14
Realized loss on subsidiaries	—	(1.18)
Net earnings attributable to shareholders	\$ 1.14	\$ 0.21

(*) The tax effects of reconciling items are shown below (in millions):

Realized gains (losses) on securities	\$ 7	\$ (7)
Realized loss on subsidiaries	—	57

In addition, realized losses on securities are shown net of noncontrolling interests of (\$1 million) in the first three months of 2016.

Net earnings attributable to shareholders increased \$82 million in the first three months of 2016 compared to the same period in 2015 due primarily to the estimated loss on the sale of substantially all of AFG's run-off long-term care insurance business recorded in the first quarter of 2015, partially offset by net realized losses on securities in the 2016 period compared to net realized gains on securities in the 2015 period. Core net operating earnings decreased \$1 million in the first three months of 2016 compared to the same period in 2015 as higher underwriting profit and net investment income in the property and casualty insurance segment was offset by lower operating earnings in the annuity segment due primarily to the impact of fair value accounting for fixed-indexed annuities, the run-off of higher yielding investments and the negative impact on investment income of certain investments that are required to be carried at fair value through earnings.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
RESULTS OF OPERATIONS — THREE MONTHS ENDED MARCH 31, 2016 AND 2015

Segmented Statement of Earnings AFG reports its business as four segments: (i) Property and casualty insurance (“P&C”), (ii) Annuity, (iii) Run-off long-term care and life and (iv) Other, which includes holding company costs and income and expenses related to the managed investment entities (“MIEs”).

AFG’s net earnings attributable to shareholders, determined in accordance with GAAP, include certain items that may not be indicative of its ongoing core operations. The following tables for the three months ended March 31, 2016 and 2015 identify such items by segment and reconcile net earnings attributable to shareholders to core net operating earnings, a non-GAAP financial measure that AFG believes is a useful tool for investors and analysts in analyzing ongoing operating trends (in millions):

(a) See the reconciliation of core earnings to GAAP net earnings under “Results of Operations — General” for details on the tax and noncontrolling interest impacts of these reconciling items.

Property and Casualty Insurance Segment — Results of Operations Performance measures such as underwriting profit or loss and related combined ratios are often used by property and casualty insurers to help users of their financial statements better understand the company’s performance. Underwriting profitability is measured by the combined ratio, which is a sum of the ratios of losses and loss adjustment expenses, and commissions and other underwriting expenses to premiums. A combined ratio under 100% indicates an underwriting profit. The combined ratio does not reflect net investment income, other income, other expenses or federal income taxes.

AFG’s property and casualty insurance operations contributed \$162 million in pretax earnings in the first three months of 2016 compared to \$133 million in the first three months of 2015, an increase of \$29 million (22%). The increase in pretax earnings reflects higher underwriting profit, primarily in the Property and transportation group and higher net investment income.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

The following table details AFG's earnings before income taxes from its property and casualty insurance operations for the three months ended March 31, 2016 and 2015 (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
Gross written premiums	\$ 1,243	\$ 1,196	4%
Reinsurance premiums ceded	(264)	(270)	(2%)

Underwriting expense ratio	33.0%	32.8%	0.2%
Combined ratio	91.3%	93.6%	(2.3%)
Aggregate — including discontinued lines			
Loss and LAE ratio	58.2%	60.9%	(2.7%)
Underwriting expense ratio	33.0%	32.8%	0.2%
Combined ratio	91.2%	93.7%	(2.5%)

AFG reports the underwriting performance of its Specialty property and casualty insurance business in the following sub-segments: (i) Property and transportation, (ii) Specialty casualty and (iii) Specialty financial.

To understand the overall profitability of particular lines, the timing of claims payments and the related impact of investment income must be considered. Certain "short-tail" lines of business (primarily property coverages) generally have quick loss payouts, which reduce the time funds are held, thereby limiting investment income earned thereon. In contrast, "long-tail" lines of business (primarily liability coverages and workers' compensation) generally have payouts that are either structured over many years or take many years to settle, thereby significantly increasing investment income earned on related premiums received.

Gross Written Premiums

Gross written premiums ("GWP") for AFG's property and casualty insurance segment were \$1.24 billion for the first three months of 2016 compared to \$1.20 billion for the first three months of 2015, an increase of \$47 million (4%). Detail of AFG's property and casualty gross written premiums is shown below (dollars in millions):

	Three months ended March 31,				
	2016		2015		% Change
	GWP	%	GWP	%	
Property and transportation	\$ 398	32%	\$ 376	32%	6%
Specialty casualty	698	56%	683	57%	2%
Specialty financial	147	12%	137	11%	7%
	\$ 1,243	100%	\$ 1,196	100%	4%

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Reinsurance Premiums Ceded

Reinsurance premiums ceded (“Ceded”) for AFG’s property and casualty insurance segment were 21% of gross written premiums for the first three months of 2016 compared to 23% for the first three months of 2015, a decrease of 2 percentage points. Detail of AFG’s property and casualty reinsurance premiums ceded is shown below (dollars in millions):

	Three months ended March 31,				Change in % of GWP
	2016		2015		
	Ceded	% of GWP	Ceded	% of GWP	
Property and transportation	\$ (87)	22%	\$ (88)	23%	(1%)
Specialty casualty	(179)	26%	(182)	27%	(1%)
Specialty financial	(22)	15%	(22)	16%	(1%)
Other specialty	24		22		
	<u>\$ (264)</u>	<u>21%</u>	<u>\$ (270)</u>	<u>23%</u>	<u>(2%)</u>

Net Written Premiums

Net written premiums (“NWP”) for AFG’s property and casualty insurance segment were \$979 million for the first three months of 2016 compared to \$926 million for the first three months of 2015, an increase of \$53 million (6%). Detail of AFG’s property and casualty net written premiums is shown below (dollars in millions):

	Three months ended March 31,				% Change
	2016		2015		
	NWP	%	NWP	%	
Property and transportation	\$ 311	32%	\$ 288	31%	8%
Specialty casualty	519	53%	501	54%	4%
Specialty financial	125	13%	115	13%	9%
Other specialty	24	2%	22	2%	9%
	<u>\$ 979</u>	<u>100%</u>	<u>\$ 926</u>	<u>100%</u>	<u>6%</u>

Net Earned Premiums

Net earned premiums (“NEP”) for AFG’s property and casualty insurance segment were \$998 million for the first three months of 2016 compared to \$946 million for the first three months of 2015, an increase of \$52 million (5%). Detail of AFG’s property and casualty net earned premiums is shown below (dollars in millions):

	Three months ended March 31,				% Change
	2016		2015		
	NEP	%	NEP	%	
Property and transportation	\$ 339	34%	\$ 313	33%	8%
Specialty casualty	502	50%	490	52%	2%
Specialty financial	132	13%	120	13%	10%
Other specialty	25	3%	23	2%	9%
	<u>\$ 998</u>	<u>100%</u>	<u>\$ 946</u>	<u>100%</u>	<u>5%</u>

The \$47 million (4%) increase in gross written premiums for the first three months of 2016 compared to the first three months of 2015 reflects growth in each of the Specialty property and casualty sub-segments. Overall average renewal rates were flat in the first three months of 2016.

Property and transportation Gross written premiums increased \$22 million (6%) in the first three months of 2016 compared to the first three months of 2015. This increase was due primarily to growth in the transportation businesses and new gross written premiums from the Singapore branch, which opened for business in June 2015. Average renewal rates increased approximately 3% for this group in the first three months of 2016, including a 5% increase in National Interstate’s renewal rates. Reinsurance premiums ceded as a percentage of gross written premiums declined approximately 1 percentage point for the first three months of 2016 compared to the first three months of 2015, reflecting lower cessions of crop insurance premiums.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Specialty casualty Gross written premiums increased \$15 million (2%) in the first three months of 2016 compared to the first three months of 2015. Higher premiums in the excess and surplus, targeted markets and executive liability businesses were partially offset by lower premiums in the workers' compensation and general liability businesses. Lower premiums in the general liability business were primarily the result of competitive market conditions, re-underwriting efforts within the Florida homebuilders market and the slowdown within the energy sector. Average renewal rates decreased approximately 1% for this group in the first three months of 2016, including a decrease of approximately 4% in the workers' compensation businesses. Excluding the workers' compensation business, average renewal rates for this group increased approximately 1% during the quarter. Reinsurance premiums ceded as a percentage of gross written premiums decreased 1 percentage point for the first three months of 2016 compared to the first three months of 2015, reflecting a change in Marketform's reinsurance structure implemented as part of its ongoing reorganization, which began at the end of 2015.

Specialty financial Gross written premiums increased \$10 million (7%) in the first three months of 2016 compared to the first three months of 2015 due primarily to growth in the financial institutions and surety businesses. Average renewal rates for this group were flat in the first three months of 2016. Reinsurance premiums ceded as a percentage of gross written premiums decreased 1 percentage point for the first three months of 2016 compared to the first three months of 2015, reflecting a decline in auto dealer business, which is heavily reinsured, partially offset by higher cessions of surety insurance premiums.

Other specialty The amounts shown as reinsurance premiums ceded represent business assumed by AFG's internal reinsurance program from the operations that make up AFG's other Specialty property and casualty insurance sub-segments.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Combined Ratio

The table below (dollars in millions) details the components of the combined ratio for AFG's property and casualty segment:

	Three months ended March 31,			Three months ended March 31,	
	2016	2015	Change	2016	2015
Property and transportation					
Loss and LAE ratio	62.2%	67.5%	(5.3%)		
Underwriting expense ratio	28.4%	30.2%	(1.8%)		
Combined ratio	90.6%	97.7%	(7.1%)		
Underwriting profit				\$ 32	\$ 7
Specialty casualty					
Loss and LAE ratio	62.4%	64.4%	(2.0%)		
Underwriting expense ratio	31.9%	29.8%	2.1%		
Combined ratio	94.3%	94.2%	0.1%		
Underwriting profit				\$ 29	\$ 28
Specialty financial					
Loss and LAE ratio	34.0%	30.4%	3.6%		
Underwriting expense ratio	48.6%	51.3%	(2.7%)		
Combined ratio	82.6%	81.7%	0.9%		
Underwriting profit				\$ 23	\$ 22
Total Specialty					
Loss and LAE ratio	58.3%	60.8%	(2.5%)		
Underwriting expense ratio	33.0%	32.8%	0.2%		
Combined ratio	91.3%	93.6%	(2.3%)		
Underwriting profit				\$ 86	\$ 60
Aggregate — including discontinued lines					
Loss and LAE ratio	58.2%	60.9%	(2.7%)		
Underwriting expense ratio	33.0%	32.8%	0.2%		
Combined ratio	91.2%	93.7%	(2.5%)		
Underwriting profit				\$ 87	\$ 60

The Specialty property and casualty insurance operations generated an underwriting profit of \$86 million in the first three months of 2016 compared to \$60 million in the first three months of 2015, an increase of \$26 million (43%). The higher underwriting profit in the first three months of 2016 reflects primarily higher underwriting profits in the Property and transportation sub-segment.

Property and transportation Underwriting profit for this group was \$32 million for the first three months of 2016 compared to \$7 million in the first three months of 2015, an increase of \$25 million (357%). This increase is due primarily to higher profitability in the crop insurance business. Underwriting profits in the transportation and property and inland marine businesses were also higher in the first three months of 2016 compared to the prior year period.

Specialty casualty Underwriting profit for this group was \$29 million for the first three months of 2016 compared to \$28 million in the first three months of 2015, an increase of \$1 million (4%). Higher underwriting profitability in the excess and surplus, executive liability, workers' compensation and general liability businesses was partially offset by restructuring costs within the Marketform operations.

Specialty financial Underwriting profit for this group was \$23 million for the first three months of 2016 compared to \$22 million in the first three months of 2015, an increase of \$1 million (5%). This increase was due primarily to higher underwriting profitability in the financial institutions business.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Other specialty Underwriting profit for this group was \$2 million for the first three months of 2016 compared to \$3 million in the first three months of 2015, a decrease of \$1 million (33%).

Losses and Loss Adjustment Expenses

AFG's overall loss and LAE ratio was 58.2% for the first three months of 2016 compared to 60.9% for the first three months of 2015, a decrease of 2.7 percentage points. The components of AFG's property and casualty losses and LAE amounts and ratio are detailed below (dollars in millions):

	Three months ended March 31,				Change in Ratio
	Amount		Ratio		
	2016	2015	2016	2015

Aggregate — including discontinued lines					
Current year, excluding catastrophe losses	\$ 601	\$ 577	60.2%	61.0%	(0.8%)
Prior accident years development	(28)	(7)	(2.8%)	(0.7%)	(2.1%)
Current year catastrophe losses	8	6	0.8%	0.6%	0.2%
Aggregate losses and LAE and ratio	<u>\$ 581</u>	<u>\$ 576</u>	<u>58.2%</u>	<u>60.9%</u>	<u>(2.7%)</u>

Current accident year losses and LAE, excluding catastrophe losses

The current accident year loss and LAE ratio, excluding catastrophe losses for AFG's Specialty property and casualty insurance operations was 60.2% for the first three months of 2016 compared to 61.0% for the first three months of 2015, a decrease of 0.8%.

Property and transportation The 0.5 percentage point increase in the loss and LAE ratio for the current year, excluding catastrophe losses reflects an increase in the loss and LAE ratio of the agricultural businesses in the first three months of 2016 compared to the first three months of 2015.

Specialty casualty The 1.1 percentage point decrease in the loss and LAE ratio for the current year, excluding catastrophe losses reflects an improvement in the loss and LAE ratio at Marketform.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Specialty financial The 1.0 percentage point decrease in the loss and LAE ratio for the current year, excluding catastrophe losses reflects an improvement in the loss and LAE ratio of the financial institutions business.

Net prior year reserve development

AFG's Specialty property and casualty insurance operations recorded net favorable reserve development related to prior accident years of \$27 million in the first three months of 2016 compared to \$7 million in the first three months of 2015, an increase of \$20 million.

Property and transportation Net favorable reserve development of \$17 million in the first three months of 2016 reflects lower than expected losses in the crop operations and lower than expected claim severity in the property and inland marine and trucking businesses, partially offset by higher than anticipated claim frequency in the ocean marine business. Net adverse reserve development of \$3 million in the first three months of 2015 reflects higher than expected claim severity and frequency at National Interstate and higher than anticipated claim frequency in the ocean marine business, partially offset by lower than expected claim severity in the property and inland marine business and lower than expected losses in the crop business.

Specialty casualty Net favorable reserve development of \$4 million in the first three months of 2016 reflects lower than anticipated claim severity in workers' compensation business and in directors and officers liability insurance, partially offset by adverse reserve development at Marketform and higher than anticipated severity in contractor claims. Net adverse reserve development of less than \$1 million in the first three months of 2015 includes higher than anticipated claim severity in contractor claims, higher than anticipated claim severity and frequency in the excess and surplus business and adverse reserve development at Marketform offset by lower than anticipated claim severity in specialty workers' compensation business and lower than anticipated claim frequency in the social services business.

Specialty financial Net favorable reserve development of \$4 million in the first three months of 2016 reflects lower than anticipated claim severity in the fidelity and crime business and lower than expected claim frequency and severity in the surety business, partially offset by higher than anticipated claim frequency in the financial institutions business. Net favorable reserve development of \$9 million in the first three months of 2015 reflects lower than anticipated claim frequency and severity in the trade credit business, lower than anticipated claim severity in the fidelity and crime business and lower than expected claim frequency and severity in the financial institutions business.

Other specialty In addition to the development discussed above, total Specialty prior year reserve development includes net favorable reserve development of \$2 million in the first three months of 2016 and \$1 million in the first three months of 2015 reflecting amortization of the deferred gain on the retroactive insurance transaction entered into in connection with the sale of businesses in 1998 and 2001 and reserve development associated with AFG's internal reinsurance program.

Catastrophe losses

AFG generally seeks to reduce its exposure to catastrophes through individual risk selection, including minimizing coastal and known fault-line exposures, and the purchase of reinsurance. Based on data available at December 31, 2015, AFG's exposure to a catastrophic earthquake or windstorm that industry models indicate could occur once in every 500 years (a "500-year event") is expected to be less than 3.5% of AFG's shareholders' equity. Catastrophe losses of \$8 million in the first three months of 2016 and \$6 million in the first three months of 2015 resulted primarily from winter storms.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Commissions and Other Underwriting Expenses

AFG's property and casualty commissions and other underwriting expenses ("U/W Exp") were \$330 million in the first three months of 2016 compared to \$310 million for the first three months of 2015, an increase of \$20 million (6%). AFG's underwriting expense ratio, calculated as commissions and other underwriting expenses divided by net premiums earned, was 33.0% for the first three months of 2016 compared to 32.8% for the first three months of 2015, an increase of 0.2 percentage points. Detail of AFG's property and casualty commissions and other underwriting expenses and underwriting expense ratios is shown below (dollars in millions):

	Three months ended March 31,				Change in % of NEP
	2016		2015		
	U/W Exp	% of NEP	U/W Exp	% of NEP	
Property and transportation	\$ 96	28.4%	\$ 95	30.2%	(1.8%)
Specialty casualty	160	31.9%	146	29.8%	2.1%
Specialty financial	64	48.6%	62	51.3%	(2.7%)
Other specialty	10	37.6%	7	34.9%	2.7%
	<u>\$ 330</u>	<u>33.0%</u>	<u>\$ 310</u>	<u>32.8%</u>	<u>0.2%</u>

AFG's overall expense ratio increased 0.2% in the first three months of 2016 as compared to the first three months of 2015.

Property and transportation Commissions and other underwriting expenses as a percentage of net earned premiums decreased 1.8 percentage points in the first three months of 2016 compared to the first three months of 2015 reflecting higher profitability-based ceding commissions received from reinsurers in the crop business.

Specialty casualty Commissions and other underwriting expenses as a percentage of net earned premiums increased 2.1 percentage points in the first three months of 2016 compared to the first three months of 2015 due primarily to restructuring related expenses at Marketform.

Specialty financial Commissions and other underwriting expenses as a percentage of net earned premiums decreased 2.7 percentage points in the first three months of 2016 compared to the first three months of 2015 reflecting lower profitability based commissions paid to agents and brokers in the financial institutions business.

Property and Casualty Net Investment Income

Net investment income in AFG's property and casualty operations was \$83 million in the first three months of 2016 compared to \$79 million in the first three months of 2015, an increase of \$4 million (5%). In recent years, yields available in the financial markets on fixed maturity securities have generally declined, placing downward pressure on AFG's investment portfolio yield. The average invested assets and overall yield earned on investments held by AFG's property and casualty operations are provided below (dollars in millions):

	Three months ended March 31,			
	2016	2015	Change	% Change
Net investment income	<u>\$ 83</u>	<u>\$ 79</u>	<u>\$ 4</u>	<u>5%</u>
Average invested assets (at amortized cost)	<u>\$ 9,366</u>	<u>\$ 8,775</u>	<u>\$ 591</u>	<u>7%</u>
Yield (net investment income as a % of average invested assets)	<u>3.54%</u>	<u>3.60%</u>	<u>(0.06%)</u>	
Tax equivalent yield (*)	<u>4.08%</u>	<u>4.16%</u>	<u>(0.08%)</u>	

(*) Adjusts the yield on equity securities and tax-exempt bonds to the fully taxable equivalent yield.

The increase in average invested assets and net investment income in the property and casualty segment for the first three months of 2016 as compared to the first three months of 2015 is due primarily to growth in the property and casualty segment. The property and casualty segment's overall yield on investments (net investment income as a percentage of average invested assets) was 3.54% for the first three months of 2016 compared to 3.60% for the first three months of 2015, a decrease of 0.06 percentage points, reflecting lower yields available in the financial markets and the impact of lower income from other investments, partially offset by the impact of higher equity in the earnings of limited partnerships and similar investments.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued**Property and Casualty Other Income and Expenses, Net**

Other income and expenses, net for AFG's property and casualty operations was a net expense of \$8 million for the first three months of 2016 compared to \$6 million for the first three months of 2015. The table below details the items included in other income and expenses, net for AFG's property and casualty operations (in millions):

	Three months ended March 31,	
	2016	2015

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Annuity Segment — Results of Operations

AFG's annuity operations contributed \$53 million in pretax earnings in the first three months of 2016 compared to \$75 million in the first three months of 2015, a decrease of \$22 million (29%). While AFG's average annuity investments (at amortized cost) were 14% higher for the first three months of 2016 as compared to the first three months of 2015, the benefit of this growth was more than offset by the impact of lower investment yields from the run-off of higher yielding investments, the negative impact on investment income of certain investments that are required to be carried at fair value through earnings and the more significant negative impact of lower than anticipated interest rates on the fair value accounting for FIAs in the 2016 period compared to the 2015 period.

The following table details AFG's earnings before income taxes from its annuity operations for the three months ended March 31, 2016 and 2015 (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015

Total before impact of derivatives related to FIAs	171	154	11%
Derivatives related to fixed-indexed annuities:			
Embedded derivative mark-to-market	17	50	(66%)
Equity option mark-to-market	40	(20)	(300%)
Impact of derivatives related to FIAs	57	30	90%
Total annuity benefits	\$ 228	\$ 184	24%

The profitability of a fixed annuity business is largely dependent on the ability of a company to earn income on the assets supporting the business in excess of the amounts credited to policyholder accounts plus expenses incurred (earning a “spread”). Performance measures such as net interest spread and net spread earned are often presented by annuity businesses to help users of their financial statements better understand the company’s performance.

Net Spread on Fixed Annuities (excludes variable annuity earnings)

The table below (dollars in millions) details the components of these spreads for AFG’s fixed annuity operations (including fixed-indexed annuities):

	Three months ended March 31,		% Change
	2016	2015	
Average fixed annuity investments (at amortized cost)	\$ 27,186	\$ 23,943	14%
Average fixed annuity benefits accumulated	26,935	23,752	13%
As % of fixed annuity benefits accumulated (except as noted):			
Net investment income (as % of fixed annuity investments)	4.60%	4.83%	
Interest credited — fixed	(2.06%)	(2.16%)	
Net interest spread	2.54%	2.67%	
Policy charges and other miscellaneous income	0.16%	0.24%	
Other annuity benefit expenses, net of guaranteed withdrawal benefit fees	(0.27%)	(0.25%)	
Acquisition expenses	(0.47%)	(0.59%)	
Other expenses	(0.38%)	(0.36%)	
Change in fair value of derivatives related to fixed-indexed annuities	(0.84%)	(0.50%)	
Net spread earned on fixed annuities	0.74%	1.21%	

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

The table below illustrates the impact of fair value accounting for derivatives related to fixed-indexed annuities on the annuity segment's net spread earned on fixed annuities:

	Three months ended March 31,	
	2016	2015
Net spread earned on fixed annuities — before impact of derivatives related to fixed-indexed annuities	1.20%	1.49%
Impact of derivatives related to fixed-indexed annuities (*)	(0.46%)	(0.28%)
Net spread earned on fixed annuities	0.74%	1.21%

(*) Change in fair value of derivatives related to fixed-indexed annuities offset by an estimate of the related acceleration/ deceleration of amortization of deferred sales inducements and deferred policy acquisition costs.

Annuity Net Investment Income

Net investment income for the first three months of 2016 was \$315 million compared to \$292 million for the first three months of 2015, an increase of \$23 million (8%). This increase reflects primarily the growth in AFG's annuity business, partially offset by the impact of lower investment yields. The overall yield earned on investments in AFG's annuity operations, calculated as net investment income divided by average investment balances (at amortized cost), declined by 0.23 percentage points to 4.60% from 4.83% in the first three months of 2016 compared to the first three months of 2015. This decline in net investment yield reflects (i) lower income from certain investments that are required to be carried at fair value through earnings, (ii) the investment of new premium dollars at lower yields as compared to the existing investment portfolio and (iii) the impact of the reinvestment of proceeds from maturity and redemption of higher yielding investments at the lower yields available in the financial markets.

Annuity Interest Credited — Fixed

Interest credited — fixed for the first three months of 2016 was \$139 million compared to \$128 million for the first three months of 2015, an increase of \$11 million (9%). The impact of growth in the annuity business was partially offset by lower interest crediting rates on new premiums as compared to the crediting rates on policyholder funds surrendered or withdrawn. The average interest rate credited to policyholders, calculated as interest credited divided by average fixed annuity benefits accumulated, decreased 0.10 percentage points to 2.06% from 2.16% in the first three months of 2016 compared to the first three months of 2015. During the first three months of 2016, interest rates credited on new premiums generally ranged from 1.00% to 2.40%.

Annuity Net Interest Spread

AFG's net interest spread decreased 0.13 percentage points to 2.54% from 2.67% in the first three months of 2016 compared to the same period in 2015 due primarily to the impact of lower investment yields. In addition, features included in current annuity product offerings allow AFG to achieve its desired profitability at a lower net interest spread than historical product offerings. As a result of these two items, AFG expects its net interest spread to narrow in the future.

Annuity Policy Charges and Other Miscellaneous Income

Annuity policy charges and other miscellaneous income, which consist primarily of surrender charges, amortization of deferred upfront policy charges (unearned revenue) and income from sales of real estate, were \$14 million for the first three months of 2016 compared to \$17 million for the first three months of 2015, a decrease of \$3 million (18%). Other miscellaneous income includes \$2 million in income from the sale of real estate in the first three months of 2016 compared to \$5 million in the first three months of 2015. As a percentage of average fixed annuity benefits accumulated, annuity policy charges and other miscellaneous income decreased 0.08 percentage points to 0.16% from 0.24% in the first three months of 2016 compared to the first three months of 2015.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued**Other Annuity Benefits, Net of Guaranteed Withdrawal Benefit Fees**

Other annuity benefits, net of guaranteed withdrawal benefit fees, for the first three months of 2016 were \$19 million compared to \$15 million for the first three months of 2015, an increase of \$4 million (27%). As a percentage of average fixed annuity benefits accumulated, these net expenses increased 0.02 percentage points to 0.27% from 0.25% in the first three months of 2016 compared to the first three months of 2015. In addition to interest credited to policyholders' accounts and the change in fair value of derivatives related to fixed-indexed annuities, annuity benefits expense also includes the following expenses (in millions, net of guaranteed withdrawal benefit fees):

	Three months ended March 31,	
	2016	2015
Change in expected death and annuitization reserve	\$ 5	\$ 4
Amortization of sales inducements	5	7
Change in guaranteed withdrawal benefit reserve	16	12
Change in other benefit reserves	5	2
Other annuity benefits	31	25
Offset guaranteed withdrawal benefit fees	(12)	(10)
Other annuity benefits, net	\$ 19	\$ 15

The guaranteed withdrawal benefit reserve related to FIAs is inversely impacted by the calculated FIA embedded derivative reserve as the value to policyholders of the guaranteed withdrawal benefits increases when the benefit of stock market participation decreases.

Annuity Acquisition Expenses

AFG's amortization of deferred policy acquisition costs ("DPAC") and commission expenses as a percentage of average fixed annuity benefits accumulated was 0.47% for the first three months of 2016 compared to 0.59% for the first three months of 2015 and has generally ranged between 0.75% and 0.85%. Variances from the general range relate primarily to the impact of (i) material changes in interest rates or the stock market on AFG's fixed-indexed annuity business, and (ii) differences in actual experience from actuarially projected estimates and assumptions. For example, the negative impact of lower than anticipated interest rates during both the first three months of 2016 and 2015 on the fair value of derivatives related to fixed-indexed annuities (discussed below) resulted in a partially offsetting deceleration in the amortization of DPAC.

The table below illustrates the estimated impact of fair value accounting for derivatives related to fixed-indexed annuities on annuity acquisition expenses as a percentage of average fixed annuity benefits accumulated:

	Three months ended March 31,	
	2016	2015
Before the impact of changes in the fair value of derivatives related to fixed-indexed annuities on the amortization of DPAC	0.83%	0.80%
Impact on amortization of DPAC of changes in fair value of derivatives related to fixed-indexed annuities (*)	(0.36%)	(0.21%)
Annuity acquisition expenses as a % of fixed annuity benefits accumulated	0.47%	0.59%

(*) An estimate of the deceleration in the amortization of deferred sales inducement and deferred policy acquisition costs resulting from fair value accounting for derivatives related to fixed-indexed annuities.

Annuity Other Expenses

Annuity other expenses for the first three months of 2016 were \$26 million compared to \$23 million for the first three months of 2015, an increase of \$3 million (13%). Annuity other expenses represent primarily general and administrative expenses, as well as selling and issuance expenses that are not deferred. The increase in annuity other expenses primarily reflects growth in the business as well as an increase in the number of sales personnel focused on new initiatives and increased market share within existing financial institutions and national marketing organizations. As a percentage of average fixed annuity benefits accumulated, these expenses increased 0.02 percentage points to 0.38% from 0.36% for the first three months of 2016 as compared to the first three months of 2015.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Change in Fair Value of Derivatives Related to Fixed-Indexed Annuities

AFG's fixed-indexed annuities, which represented approximately 60% of annuity benefits accumulated at March 31, 2016, provide policyholders with a crediting rate tied, in part, to the performance of an existing stock market index. AFG attempts to mitigate the risk in the index-based component of these products through the purchase of call options on the appropriate index. AFG's strategy is designed so that the change in the fair value of the call option assets will generally offset the economic change in the liabilities from the index participation. Both the index-based component of the annuities and the related call options are considered derivatives that must be adjusted for changes in fair value through earnings each period. The fair values of these derivatives are impacted by actual and expected stock market performance and interest rates as well as other factors. For a list of other factors impacting the fair value of the index-based component of AFG's annuity benefits accumulated, see *Note D — "Fair Value Measurements"* to the financial statements. The net change in fair value of derivatives related to fixed-indexed annuities increased annuity benefits by \$57 million in the first three months of 2016 compared to \$30 million in the first three months of 2015 as a result of lower than expected interest rates in each period. As a percentage of average fixed annuity benefits accumulated, this net expense increased 0.34 percentage points to 0.84% from 0.50% in the first three months of 2016 compared to the first three months of 2015.

Fluctuations in interest rates and the stock market, among other factors, can cause volatility in the periodic measurement of fair value of the embedded derivative that management believes can be inconsistent with the long-term economics of these products. The table below illustrates the impact of fair value accounting for derivatives related to fixed-indexed annuities on the annuity segment's earnings before income taxes (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
Earnings before income taxes — before change in fair value of derivatives related to fixed-indexed annuities	\$ 84	\$ 92	(9%)
Change in fair value of derivatives related to fixed-indexed annuities	(57)	(30)	90%
Related impact on amortization of DPAC (*)	26	13	100%
Earnings before income taxes	\$ 53	\$ 75	(29%)

(*) An estimate of the related acceleration/deceleration of amortization of deferred sales inducements and deferred policy acquisition costs.

As illustrated in the table above, the change in fair value of derivatives related to fixed-indexed annuities, including the related impact on amortization of DPAC decreased the annuity segment's earnings before income taxes by \$31 million in the first three months of 2016 and \$17 million in the first three months of 2015.

Annuity Net Spread Earned on Fixed Annuities

AFG's net spread earned on fixed annuities decreased 0.47 percentage points to 0.74% from 1.21% in the first three months of 2016 compared to the same period in 2015 due primarily to the net impact of changes in the fair value of derivatives and related DPAC amortization offset discussed above, the 0.13 percentage points decrease in AFG's net interest spread and lower income from sales of real estate.

Annuity Benefits Accumulated

Annuity premiums received and benefit payments are recorded as increases or decreases in annuity benefits accumulated rather than as revenue and expense. Increases in this liability for interest credited and other benefits are charged to expense and decreases for surrender and other policy charges are credited to other income.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

For certain products, annuity benefits accumulated also includes reserves for accrued persistency and premium bonuses, excess benefits expected to be paid on future deaths and annuitizations (“EDAR”) and guaranteed withdrawal benefits. Annuity benefits accumulated also includes amounts advanced from the Federal Home Loan Bank of Cincinnati. The following table is a progression of AFG’s annuity benefits accumulated liability for the three months ended March 31, 2016 and 2015 (in millions):

	Three months ended March 31,	
	2016	2015
Beginning fixed annuity reserves	\$ 26,371	\$ 23,462
Fixed annuity premiums (receipts)	1,276	802
Federal Home Loan Bank advances	150	—
Surrenders, benefits and other withdrawals	(483)	(420)
Interest and other annuity benefit expenses:		
Interest credited	139	128
Embedded derivative mark-to-market	17	50
Change in other benefit reserves	29	20
Ending fixed annuity reserves	<u>\$ 27,499</u>	<u>\$ 24,042</u>
Reconciliation to annuity benefits accumulated per balance sheet:		
Ending fixed annuity reserves (from above)	\$ 27,499	\$ 24,042
Impact of unrealized investment gains	127	179
Fixed component of variable annuities	186	190
Annuity benefits accumulated per balance sheet	<u>\$ 27,812</u>	<u>\$ 24,411</u>

Statutory Annuity Premiums

AFG’s annuity operations generated statutory premiums of \$1.29 billion in the first three months of 2016 compared to \$813 million in the first three months of 2015, an increase of \$472 million (58%). The following table summarizes AFG’s annuity sales (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
Financial institutions single premium annuities — indexed	\$ 534	\$ 356	50%
Financial institutions single premium annuities — fixed	119	38	213%
Retail single premium annuities — indexed	546	349	56%
Retail single premium annuities — fixed	20	12	67%
Education market — fixed and indexed annuities	57	47	21%
Total fixed annuity premiums	1,276	802	59%
Variable annuities	9	11	(18%)
Total annuity premiums	<u>\$ 1,285</u>	<u>\$ 813</u>	58%

Management believes the 58% increase in annuity premiums in the first three months of 2016 as compared to the first three months of 2015 is consistent with overall growth in the annuity industry, as sales of traditional fixed and fixed-indexed annuities have increased while sales of variable annuities have decreased. In addition, the increase reflects new products, additional staffing, and increased market share within existing financial institutions and national marketing organizations. Furthermore, AFG has reduced the crediting rates on its new annuity sales several times in the first three months of 2016 due to the decline in interest rates; these reductions, once announced, often lead to a short-term spike in sales in advance of the effective date of the rate decreases.

On April 6, 2016, the Department of Labor (“DOL”) issued the final version of its fiduciary rule that will impose additional requirements on the sale of certain annuities for inclusion in retirement accounts, including individual retirement accounts. Unlike the draft rule released in April 2015, the final rule made the more stringent fiduciary requirements for retirement accounts applicable to the sale of fixed-indexed annuities. It is expected that all carriers will experience some impact when the rule takes effect in 2017, including additional compliance costs and temporary sales disruption during the transition period.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Management continues to evaluate the new rule and consult with distribution partners to determine appropriate changes to product offerings and/or compensation arrangements. Based on its analysis to date, management does not believe the implementation of the final DOL rule will have a material impact on AFG's results of operations.

Annuity Earnings before Income Taxes Reconciliation

The following table reconciles the net spread earned on AFG's fixed annuities to overall annuity pretax earnings for the three months ended March 31, 2016 and 2015 (in millions):

	Three months ended March 31,	
	2016	2015
Earnings on fixed annuity benefits accumulated	\$ 50	\$ 72
Earnings on investments in excess of fixed annuity benefits accumulated (*)	3	2
Variable annuity earnings (loss)	—	1
Earnings before income taxes	\$ 53	\$ 75

(*) Net investment income (as a % of investments) of 4.60% and 4.83% for the three months ended March 31, 2016 and 2015, respectively, multiplied by the difference between average fixed annuity investments (at amortized cost) and average fixed annuity benefits accumulated in each period.

Run-off Long-Term Care and Life Segment — Results of Operations AFG's run-off long-term care and life segment incurred a GAAP pretax loss of \$1 million for the first three months of 2016 compared to \$158 million for the first three months of 2015. Results for the 2015 period include a \$162 million estimated pretax non-core realized loss on the sale of subsidiaries containing substantially all of AFG's run-off long-term care insurance business, which closed in the fourth quarter of 2015. See *Note B — "Sale of Business"* to the financial statements. The following table details AFG's GAAP and core earnings (loss) before income taxes from its run-off long-term care and life operations for the three months ended March 31, 2016 and 2015 (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
Revenues:			
Net earned premiums:			
Long-term care	\$ 1	\$ 17	(94%)
Life operations	5	8	(38%)
Net investment income	5	20	(75%)
Other income	1	1	—%
Total revenues	12	46	(74%)
Costs and Expenses:			
Life, accident and health benefits:			
Long-term care	1	21	(95%)
Life operations	8	11	(27%)
Acquisition expenses	1	4	(75%)
Other expenses	3	6	(50%)
Total costs and expenses	13	42	(69%)
Core earnings (loss) before income taxes	(1)	4	(125%)
Pretax non-core realized loss on subsidiaries	—	(162)	(100%)
GAAP loss before income taxes	\$ (1)	\$ (158)	(99%)

The decrease in long-term care net earned premiums and benefit expense in the first three months of 2016 compared to the first three months of 2015 is due to the sale of subsidiaries containing substantially all of AFG's run-off long-term care insurance business in December of 2015.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Holding Company, Other and Unallocated — Results of Operations AFG's net pretax loss outside of its insurance operations (excluding realized gains and losses) totaled \$40 million for the first three months of 2016 compared to \$39 million for the first three months of 2015.

The following table details AFG's loss before income taxes from operations outside of its insurance operations for the three months ended March 31, 2016 and 2015 (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
Revenues:			
Net investment income	\$ 1	\$ —	—%
Other income — P&C fees	13	12	8%
Other income	7	8	(13%)
Total revenues	21	20	5%
Costs and Expenses:			
Property and casualty insurance — commissions and other underwriting expenses	4	3	33%
Interest charges on borrowed money	18	19	(5%)
Other expense — expenses associated with P&C fees	9	9	—%
Other expenses	30	28	7%
Total costs and expenses	61	59	3%
Loss before income taxes, excluding realized gains and losses	\$ (40)	\$ (39)	3%

Holding Company and Other — Net Investment Income

AFG recorded net investment income on investments held outside of its insurance operations of \$1 million in the first three months of 2016 compared to less than \$1 million in the first three months of 2015.

Holding Company and Other — P&C Fees and Related Expenses

Summit, the workers' compensation insurance business that AFG acquired in April 2014, collects fees from a small group of unaffiliated insurers for providing underwriting, policy administration and claims services. In addition, certain of AFG's property and casualty businesses collect fees from customers for ancillary services such as workplace safety programs and premium financing. In the first three months of 2016, AFG collected \$13 million in fees for these services compared to \$12 million in the first three months of 2015. Management views this fee income, net of the \$9 million in both the first three months of 2016 and 2015, in expenses incurred to generate such fees, as a reduction in the cost of underwriting its property and casualty insurance policies. Consistent with internal management reporting, these fees and the related expenses are netted and recorded as a reduction of commissions and other underwriting expenses in AFG's segmented results.

Holding Company and Other — Other Income

Other income in the table above includes \$4 million in both the first three months of 2016 and 2015 in management fees paid to AFG by the AFG-managed CLOs (AFG's consolidated managed investment entities). The management fees are eliminated in consolidation — see the other income line in the Consolidate MIEs column under "Results of Operations — Segmented Statement of Earnings." Excluding amounts eliminated in consolidation, AFG recorded other income outside of its insurance operations of \$3 million in the first three months of 2016 and \$4 million in the first three months of 2015. Results for the first three months of 2015 include \$2 million in income from the sale of real estate.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued
Holding Company and Other — Interest Charges on Borrowed Money

AFG's holding companies and other operations outside of its insurance operations recorded interest expense of \$18 million and \$19 million in the first three months of 2016 and 2015, respectively. The following table details the principal amount of AFG's long-term debt balances as of January 1, 2016 compared to January 1, 2015 (dollars in millions):

	January 1, 2016	January 1, 2015
Direct obligations of AFG:		
9-7/8% Senior Notes due June 2019	\$ 350	\$ 350
6-3/8% Senior Notes due June 2042	230	230
5-3/4% Senior Notes due August 2042	125	125
7% Senior Notes due September 2050	—	132
6-1/4% Subordinated Debentures due September 2054	150	150
6% Subordinated Debentures due November 2055	150	—
Other	3	3
Total principal amount of Holding Company Debt	<u>\$ 1,008</u>	<u>\$ 990</u>
Weighted Average Interest Rate	<u>7.4%</u>	<u>7.6%</u>

AFG redeemed its \$132 million in outstanding 7% Senior Notes due September 2050 at par value on September 30, 2015. AFG issued \$150 million of 6% Subordinated Debentures in November 2015. The impact of higher average indebtedness during the first three months of 2016 as compared to the first three months of 2015 was more than offset by a lower weighted average interest rate and the favorable impact of the interest rate swap on the 9-7/8% Senior Notes due June 2019 that was entered into in June 2015.

Holding Company and Other — Other Expenses

AFG's holding companies and other operations outside of its insurance operations recorded other expenses of \$30 million in the first three months of 2016 compared to \$28 million in the first three months of 2015, an increase of \$2 million (7%).

Consolidated Realized Gains (Losses) on Securities AFG's consolidated realized gains (losses) on securities, which are not allocated to segments, were losses of \$18 million in the first three months of 2016 compared to gains of \$19 million in the first three months of 2015, a decrease of \$37 million (195%). Realized gains (losses) on securities consisted of the following (in millions):

	Three months ended March 31,	
	2016	2015
Realized gains (losses) before impairments:		
Disposals	\$ 38	\$ 26
Change in the fair value of derivatives	(1)	(2)
Adjustments to annuity deferred policy acquisition costs and related items	(3)	(1)
	<u>34</u>	<u>23</u>
Impairment charges:		
Securities	(57)	(7)
Adjustments to annuity deferred policy acquisition costs and related items	5	3
	<u>(52)</u>	<u>(4)</u>
Realized gains (losses) on securities	<u>\$ (18)</u>	<u>\$ 19</u>

AFG's impairment charges on securities for the first three months of 2016 consist of \$41 million on equity securities and \$16 million on fixed maturities. Approximately \$33 million of the charges are related to financial institutions and \$16 million are on energy related investments. Approximately \$6 million in impairment charges recorded in the first quarter of 2015 are attributable to energy related investments.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

Consolidated Realized Loss on Subsidiaries In the first three months of 2015, AFG recorded an estimated pretax loss of \$162 million on the sale of subsidiaries containing substantially all of AFG's run-off long-term care insurance business. See *Note B — "Sale of Business"* to the financial statements.

Consolidated Income Taxes AFG's consolidated provision for income taxes was \$52 million for the first three months of 2016 compared to \$5 million for the first three months of 2015, an increase of \$47 million. See *Note L — "Income Taxes"* to the financial statements for an analysis of items affecting AFG's effective tax rate.

Consolidated Noncontrolling Interests AFG's consolidated net earnings attributable to noncontrolling interests was \$3 million for the first three months of 2016 compared to \$6 million for the first three months of 2015. The following table details net earnings in consolidated subsidiaries attributable to holders other than AFG (dollars in millions):

	Three months ended March 31,		% Change
	2016	2015	
National Interstate	\$ 3	\$ 4	(25%)
Other	—	2	(100%)
Earnings attributable to noncontrolling interests	\$ 3	\$ 6	(50%)

RECENTLY ADOPTED ACCOUNTING STANDARDS

See *Note A — "Accounting Policies — Managed Investment Entities"* to the financial statements for a discussion of accounting guidance adopted on January 1, 2016, which impacts the consolidation of collateralized financing entities such as CLOs, as well as limited partnerships and similar investments.

See *Note A — "Accounting Policies — Debt Issuance Costs"* to the financial statements for a discussion of accounting guidance adopted on January 1, 2016, which impacted the presentation of debt issuance costs.

ACCOUNTING STANDARDS TO BE ADOPTED

In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-09, *Financial Services – Insurance: Disclosures About Short-Duration Contracts*, which requires additional disclosures about the liability for unpaid losses and loss adjustment expenses (including accident year information). AFG will be required to adopt the updated guidance for annual reporting beginning in 2016 and interim reporting beginning with the first quarter of 2017. Because the new guidance does not affect the existing recognition or measurement guidance, the adoption will have no effect on AFG's financial condition or results of operations.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities* which, among other things, requires equity investments that are not accounted for under the equity method of accounting to be measured at fair value with changes in fair value recognized in net income, clarifies that the need for a valuation allowance on a deferred tax asset related to available for sale securities should be evaluated with other deferred tax assets and modifies disclosure requirements for financial instruments. AFG will be required to adopt the updated guidance effective January 1, 2018 (early adoption is not permitted). Although recording changes in the fair value of investments in equity securities in net income will result in more volatility in AFG's Statement of Earnings, it is not expected to have a material effect on the carrying value of AFG's investments or on overall shareholders' equity as AFG's investments in equity securities are currently carried at fair value through accumulated other comprehensive income.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires entities that lease assets for terms longer than one year to recognize the assets and liabilities for the rights and obligations created by those leases on the balance sheet based on the present value of cash flows. Qualitative and quantitative disclosures of the amount, timing and uncertainty of cash flows arising from leases will also be required. Although the guidance allows for early adoption, AFG expects to adopt the updated guidance effective January 1, 2019 (when it is required). The guidance will require that the earliest comparative period presented to include the measurement and recognition of existing leases with an adjustment to shareholders' equity as if the updated guidance had always been applied. Although the guidance will result in higher assets and higher liabilities from the recognition of assets and liabilities related to operating leases, it does not change the manner in which lease expense is recognized in the statement of earnings. Although management is currently evaluating the impact of this guidance, AFG does not expect it to have a material effect on its results of operations or financial position.

Management's Discussion and Analysis of Financial Condition and Results of Operations — Continued

In March 2016, the FASB issued ASU 2016-09, *Compensation – Stock Compensation: Improvements to Employee Share-Based Payment Accounting*, which simplifies several aspects of the accounting for share-based payment transactions including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. AFG will be required to adopt the updated guidance effective January 1, 2017. Management does not expect the adoption of this guidance to have a material effect on its results of operations or financial position.

ITEM 3

Quantitative and Qualitative Disclosure about Market Risk

As of March 31, 2016, there were no material changes to the information provided in *Item 7A — Quantitative and Qualitative Disclosures about Market Risk* of AFG's 2015 Form 10-K.

ITEM 4

Controls and Procedures

AFG's management, with participation of its Co-Chief Executive Officers and its Chief Financial Officer, has evaluated AFG's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15) as of the end of the period covered by this report. Based on that evaluation, AFG's Co-CEOs and CFO concluded that the controls and procedures are effective. There have been no changes in AFG's internal control over financial reporting during the first fiscal quarter of 2016 that materially affected, or are reasonably likely to materially affect, AFG's internal control over financial reporting.

In the ordinary course of business, AFG and its subsidiaries routinely enhance their information systems by either upgrading current systems or implementing new systems. There has been no change in AFG's business processes and procedures during the first fiscal quarter of 2016 that has materially affected, or is reasonably likely to materially affect, AFG's internal control over financial reporting.

**PART II
OTHER INFORMATION**

ITEM 2

Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities AFG repurchased shares of its Common Stock during the first three months of 2016 as follows:

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs (a)
January	951,394	\$ 67.70	951,394	2,093,420
February	106,061	67.06	106,061	4,987,359
March	70,673	69.92	70,673	4,916,686
Total	<u>1,128,128</u>	<u>\$ 67.78</u>	<u>1,128,128</u>	

(a) Represents the remaining shares that may be repurchased under the Plan authorized by AFG's Board of Directors in December 2014. In February 2016, AFG's Board of Directors authorized the repurchase of three million additional shares.

In addition, AFG acquired 57 shares of its Common Stock (at \$68.53 per share) in January 2016 and 27,494 shares (at an average of \$66.89 per share) in February 2016 in connection with its stock incentive plans.

SARBANES-OXLEY SECTION 302(a) CERTIFICATIONS

I, Carl H. Lindner III, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Financial Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

AMERICAN FINANCIAL GROUP, INC. 10-Q

CERTIFICATION OF CHIEF EXECUTIVE OFFICER AND CHIEF FINANCIAL OFFICER

Pursuant to section 906 of the Sarbanes-Oxley Act of 2002

In connection with the filing with the Securities and Exchange Commission of the Quarterly Report of American Financial Group, Inc. (the "Company") on Form 10-Q for the period ended March 31, 2016 (the "Report"), the undersigned officers of the Company, certify, pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that to the best of their knowledge:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
